Whereas, I Nij Dorairaj of <address>, hereafter referred to as applicant, have invented certain new and useful improvements for which an application for a United States Patent was filed on 12/26/2007, having Application Number 11/964084, which issued as United States Patent No. 7,602,213

Whereas, Tier Logic Inc., a Delaware Corporation, here referred to as "assignee" whose mailing address is P.O. Box 2760, Cupertino, California is desirous of acquiring the entire right, title and interest in the same;

Now, therefore, in consideration of good and valuable consideration, the receipt and sufficiency of which the applicant acknowledge, I by these presents do hereby irrevocably and unconditionally convey, assign, and transfer unto said assignee the full and exclusive right of my share to said invention in the United States and in any other country the entire rights, title and interest in and to any and all Patents which may be granted therefore in the United States and in any other country including any continuations, divisions, continuations in part, reexaminations, and reissues thereof, and also including the right to sue for damages or other remedies in respect of any past, present, or future infringement thereof.

I hereby authorize and request the Director of the U.S. Patent and Trademark Office to issue said United States Patent to said assignee, of the entire right, title, and interest in and to the same, for his sole use and behoof; and for the use and behoof of his legal representatives, to the full end of the term for which said Patent may be granted, as fully and entirely as the same would have been held by me had this assignment and sale not been made.
