## ASSIGNMENT BY INVENTORS

This Assignment is by James M. Cleeves; Michael Hawkes; and William H. Anderson (the "Assignors"), residing at 551 Summit Drive, Redwood City, California 94062; 2301 Larkin Street, #307, San Francisco, California 94070; and 6260 Bridgeport Drive, Cameron Park, California 95682, respectively. The Assignors have invented one or more certain inventions (the "Invention(s)") described in a Patent application for Letters Patent of the United States entitled POSITIVE CONTROL (DESMODROMIC) VALVE SYSTEMS FOR INTERNAL COMBUSTION ENGINES (the "Application"), executed concurrently herewith and naming the Assignors as inventors. The Assignors authorize the Assignee, identified below, or its representatives to insert the application number of the Application \_\_\_\_\_ when known.

Pinnacle Engines, Inc., a Corporation of California having its principal place of business at 1300 Industrial Road, Suite 1A, San Carlos, CA 94070 ("Assignee"), desires to acquire the entire right, title and interest in and to the Invention(s) and the Application, and in and to any patents (collectively, "Patents") that may be granted for the Invention(s) in the United States or in any foreign countries.

For valuable consideration, the receipt and sufficiency of which Assignors acknowledge, Assignors hereby sell, assign, and transfer to Assignee, its successors, legal representatives and assigns, the entire right, title and interest in and to: the Invention(s), the Application, and any Patents; any divisions, continuations, and continuations-in-part of the Application and any other application claiming priority rights from the Application; any reissues, reexaminations, or extensions of any and all Patents; the right to file foreign applications directly in the name of Assignee; and the right to claim priority rights deriving from the Application (collectively, the "Rights"). Assignors warrant that Assignors own the Rights, and that the Rights are unencumbered. Assignors also agree to not sign any writing or do any act conflicting with this assignment, and, without further compensation, sign all documents and do such additional acts as Assignee reasonably deems necessary or desirable to: perfect Assignee's enjoyment of the Rights; conduct proceedings regarding the

Rights, including any litigation or interference proceedings; or perfect or defend title to the Rights. Assignee agrees to reasonably compensate Assignors for any such additional acts that are provided after the Assignors have left the employ of the Assignee, its successors, legal representatives and assigns. Assignors request the Commissioner of Patents to issue any Patent of the United States that may be issued on the Invention(s) to Assignee. This Assignment may be executed in counterparts.
