The below named inventor(s) own(s) the entire right title and interest to the invention ("the invention") that is the subject matter of the below United States non-provisional patent application ("Non-provisional Application") entitled:

Pursuant to an agreement between each inventor and Deere & Company, a Delaware corporation having its principal office at Moline, Illinois, as well as other good and valuable considerations paid to each inventor, each inventor agrees to assign, and hereby does assign to Deere & Company the entire right, title and interest which said inventor has or may have to the invention, the Non-provisional Application and the Provisional Application.

The assigned rights include all rights to file U.S. and foreign patent applications for the invention described in the Provisional Application, the Non-provisional Application, or both in the name of each inventor or Deere & Company, as well as any right of priority to any letters patent of the United States or any other country that may be granted for the invention, and any continuations, divisions, continuation-in-part, reissues, reexaminations, or extensions of any of the foregoing applications or patents, or any patents or applications that claim priority based on any of the foregoing patents or applications.
