PATENT

EXHIBIT E

PATENT RIGHTS ASSIGNMENT

WHEREAS, Jan Wallace, an individual ("Assignor") owns all, right, title, and interest in and to the inventions and improvements claimed in the patents and patent applications specified on the attached Exhibit D (collectively, the "Patent Rights") by virtue of an assignment from MW Medical, Inc., a Nevada Corporation, to Assignor, wherein Microwave Medical Corporation, a California Corporation, was a wholly owned subsidiary of MW Medical, Inc., and

WHEREAS, Miramar Labs, Inc., a Delaware corporation (the "Assignee") wants to acquire all interest in the inventions and the Patent Rights including any patents or registrations that may arise therefrom (collectively, "Letters Patents and Registrations");

For good and valuable consideration, receipt of which is hereby acknowledged by Assignor, Assignor has assigned, and does assign to Assignee all right, title and interest in and to the inventions claimed in the and the Patent Rights and to all foreign counterparts (including patent, utility model and industrial designs), and in and to any Letters Patent and Registrations which may hereafter be granted on the same in the United States and all countries throughout the world, and to claim the priority from the applications as provided by the Paris Convention. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made, for the full term of any Letters Patent and Registrations which may be granted thereon, or of any and all substitutions, extensions, confirmations, reissues, divisions, re-examinations, renewals and extensions thereof.

Assignor further agrees that Assignor will, without charge to Assignee, but at Assignee's expense, (a) cooperate with Assignee in the prosecution of the Patent Rights and foreign counterparts thereof, (b) execute, verify, acknowledge and deliver all such further papers and instruments of transfer and (c) perform such other acts as Assignee lawfully may request to obtain or maintain Letters Patent and Registrations for the invention and improvements in any and all countries, and to vest title thereto in Assignee, or Assignee's successors and assigns.
