## ASSIGNMENT OF PATENTS

**WHEREAS**, Forterra Systems, Inc., a California corporation (the “**Company**”), and Science Applications International Corporation, a Delaware corporation (“**SAIC**”), entered into an Asset Purchase Agreement, dated as of January 28, 2010 (the “**Agreement**”); and

**WHEREAS**, pursuant to the transactions contemplated by the Agreement, SAIC is desirous of acquiring, and the Company is desirous of assigning to SAIC, all of the right, title, and interest of the Company into said Patents in **Exhibit A**, and the inventions disclosed therein and covered thereby.

**NOW THEREFORE**, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Company and SAIC agree as follows:

1. The Company does hereby sell, assign, transfer and set over to SAIC, all of the Company’s right, title and interest to the Patents, and to any and all inventions covered by the Patents, in the United States, its territorial possessions and all foreign countries, and in any and all continuations-in-part, continuations, divisions, substitutes, reissues, extensions thereof, and all other applications for letters patent relating thereto that have been or shall be filed in the United States, its territorial possessions and/or any foreign countries, and all rights, together with all priority rights, under any of the international conventions, unions, agreements, acts, and treaties, including all future conventions, unions, agreements, acts, and treaties, the same to be held and enjoyed by SAIC for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, to the end of the term or terms for which letters patent are or may be granted or reissued as fully and entirely to the same extent as the same would have been held and enjoyed by the Company, if this assignment and sale had not been made; together with all claims for damages or injunctive relief by reason of infringements of such letters patent resulting from the Patent, with the right to sue for past infringement, and collect the same for its own use and behalf and for the use and behalf of its successors, assigns or other legal representatives.
2. The Company hereby authorizes and requests the Commissioner of Patents and Trademarks to issue any and all letters patents of the United States on such inventions or resulting from the Patent, or any continuations-in-part, continuations, divisions, substitutes, reissues or extensions thereof, to SAIC, as assignee of the Company’s entire interest.
3. The Company agrees that upon request by SAIC, or its successors, assigns or other legal representatives that the Company or its successors, assigns or other legal representatives shall do all other legal acts reasonably necessary to carry out the intent of this assignment at the assignee's expense and request as well as provide such other material, information, or assistance as assignee or its successors, assigns or other legal representatives may consider necessary with respect thereto.

4. **IN WITNESS WHEREOF**, Assignor has caused this Assignment of the Patents listed on the attached Exhibit A to be executed by its duly authorized representative on this 28 day of January, 2010.
