PATENT ASSIGNMENT

This PATENT ASSIGNMENT is made as of the 29th day of NOVEMBER, 2011, by and between Agilent Technologies Research Corporation, a Delaware corporation, with its principal place of business at 11011 North Torrey Pines Road, La Jolla, California 92037 ("ATRC"), and Catalyst Assets LLC, a Delaware limited liability company, with its principal place of business at 3545 South Park Drive, Jackson, Wyoming 83001 ("Catalyst").

WHEREAS, pursuant to an assignment and license agreement dated June 7, 2007 ("the 2007 Assignment"), Stratagene Corporation transferred and assigned to Catalyst all of its right, title, and interest in and to United States Patent Number 5,858,731 ("the '731 Patent");

WHEREAS, questions have arisen regarding the effect of the 2007 Assignment in view of the possible lack of identity between Stratagene Corporation and Stratagene California, which latter entity was assigned rights to the '731 Patent pursuant to an assignment dated January 30, 1998 ("the 1998 Assignment");

WHEREAS, if the 2007 Assignment were not effective, the '731 Patent would be owned by ATRC, the successor-in-interest to Stratagene California;

AND WHEREAS, ATRC wishes to avoid any doubt about the effective transfer to Catalyst of all rights in and to the '731 Patent and its ownership by Catalyst, and Catalyst desires to establish conclusively that it has received a transfer and assignment of all right, title, and interest in, to, and under the '731 Patent and the invention therein described and claimed, expressly including but not limited to the right to sue and collect damages for past infringement of the '731 Patent;

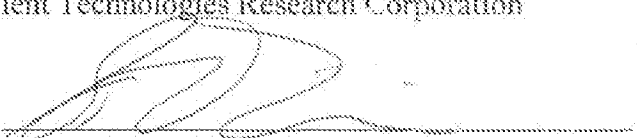

NOW, THEREFORE, for good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, ATRC does hereby transfer and assign to Catalyst, and Catalyst hereby accepts the transfer and assignment of, all of ATRC's worldwide right, title and interest in, to, and under the '731 Patent and the invention therein described and claimed, including but not limited to the right to sue and collect damages for past infringement of the '731 Patent, the same to be held and enjoyed by Catalyst, its successors and assigns from and after the date hereof as fully and entirely as the same would have been held and enjoyed by ATRC had this Patent Assignment not been made.

ATRC agrees that it will, without demanding any further consideration therefor, at the request but at the expense of Catalyst, do all lawful and just acts, including the execution and acknowledgment of instruments, that may be or become necessary for maintaining and perfecting any rights hereby acquired by Catalyst.

IN WITNESS WHEREOF, ATRC has caused its duly authorized officer to execute this Patent Assignment as of the date first above written.
