PATENT SECURITY AGREEMENT

This PATENT SECURITY AGREEMENT, dated as of October 31, 2011 (this "Agreement"), is made by ACUSHNET COMPANY, a Delaware corporation (the "Grantor"), in favor of KOREA DEVELOPMENT BANK, NEW YORK BRANCH ("KDB NY"), as the administrative agent (together with its successor(s) thereto in such capacity, the "Collateral Agent") for each of the Secured Parties.

W I T N E S S E T H :

WHEREAS, pursuant to the Senior Revolving Facilities Agreement, dated as of July 22, 2011 (as amended, modified, restated, consolidated, replaced or supplemented from time to time, the "Revolving Agreement"), among Alexandria Holdings Corp., a Delaware corporation, the Borrower, various financial institutions and other parties from time to time parties thereto (the "Revolving Lenders"), KDB NY, as administrative agent and security agent, and Korea Development Bank as Arranger, the Revolving Lenders have extended commitments to make credit extensions to the Borrower;

WHEREAS, pursuant to the Subscription Agreement, dated October 13, 2011, between the Grantor and Korea Development Bank, as the Mandated Lead Arranger (the "Lead Arranger"), the Grantor has authorized and the Lead Arranger has agreed to subscribe and pay for, or to procure subscriptions and payment for, certain secured floating rate notes (the "Notes") with a principal amount of \$500,000,000 to be issued in accordance with the Agency Agreement, dated concurrently herewith (as amended, modified, restated, consolidated, replaced or supplemented from time to time, the "Agency Agreement") (the Agency Agreement, together with the Revolving Agreement shall be referred to herein as the "Financing Agreements"), between Borrower, and KDB Asia Limited. Any holder of such Note, a "Noteholder" and collectively, the "Noteholders," and together with the Revolving Lenders, collectively referred to herein as the "Secured Parties";

WHEREAS, in connection with the Financing Agreements, the Grantor has executed and delivered an Amended and Restated Pledge and Security Agreement, dated as of October 31, 2011 (as amended, supplemented, amended and restated or otherwise modified from time to time, the "Security Agreement");

WHEREAS, pursuant to the Financing Agreements and the Security Agreement, the Grantor is required to execute and deliver this Agreement and to grant to the Collateral Agent a continuing security interest in all of the Patent Collateral (as defined below) to secure all Obligations; and

WHEREAS, the Grantor has duly authorized the execution, delivery and performance of this Agreement;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Grantor agrees, for the benefit of each Secured Party, as follows:

SECTION 1. Definitions. Unless otherwise defined herein or the context otherwise requires, terms used in this Agreement, including its preamble and recitals, have the meanings provided in the Security Agreement.

SECTION 2. Grant of Security Interest. The Grantor hereby collaterally assigns and pledges to the Collateral Agent, for its benefit and the ratable benefit of each other Secured Party, and hereby grants to the Collateral Agent, for its benefit and the ratable benefit of each other Secured Party, a continuing security interest in all of the following property, whether now or hereafter existing or acquired by the Grantor (the "Patent Collateral"):

(a) all of its letters patent and applications for letters patent throughout the world, including all patent applications in preparation for filing and each patent and patent application referred to in Item A of Schedule I attached hereto;

(b) all reissues, divisions, continuations, continuations-in-part, extensions, renewals and reexaminations of any of the items described in clause (a);

(c) all of its patent licenses, and other agreements providing the Grantor with the right to use any items of the type referred to in clauses (a) and (b) above, including each patent license referred to in Item B of Schedule I attached hereto; and

(d) all Proceeds of, and rights associated with, the foregoing (including license royalties and Proceeds of infringement suits), the right to sue third parties for past, present or future infringements of any patent or patent application, and for breach or enforcement of any patent license.

SECTION 3. Security Agreement. This Agreement has been executed and delivered by the Grantor for the purpose of registering the security interest of the Collateral Agent in the Patent Collateral with the United States Patent and Trademark Office and corresponding offices in Canada. The security interest granted hereby has been granted as a supplement to, and not in limitation of, the security interest granted to the Collateral Agent for its benefit and the ratable benefit of each other Secured Party under the Security Agreement. The Security Agreement (and all rights and remedies of the Collateral Agent and each Secured Party thereunder) shall remain in full force and effect in accordance with its terms.

SECTION 4. Acknowledgment. The Grantor does hereby further acknowledge and affirm that the rights and remedies of the Collateral Agent with respect to the security interest in the Patent Collateral granted hereby are more fully set forth in the Security Agreement, the terms and provisions of which (including the remedies provided for therein) are incorporated by reference herein as if fully set forth herein.

SECTION 5. Loan Document. This Agreement is a Loan Document executed pursuant to each of the Financing Agreement and shall (unless otherwise expressly indicated herein) be construed, administered and applied in accordance with the terms and provisions thereof.

SECTION 6. Counterparts. This Agreement may be executed by the parties hereto in several counterparts, each of which shall be deemed to be an original and all of which shall constitute together but one and the same agreement.
