Greenwave is desirous of acquiring the entire right, title and interest in said Invention, in any patent applications pertaining thereto, and in any Letters Patent(s) that may be granted for said Invention in the United States of America or any foreign country. The Inventor desires to grant such rights to Greenwave.

Therefore, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the undersigned Inventor ("Assignor") hereby sells, assigns, and otherwise transfers to Greenwave (the "Assignee"), its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the Invention, the above-identified United States patent application (if any), and any and all other patent applications and patents for the Invention which may be applied for or granted in the United States and in all foreign countries and jurisdictions. This includes all issued utility patents or design patents, originally filed applications, divisions, continuations, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and extensions thereof ("Related Applications") and all rights of priority resulting from the filing of such Related Applications and granting of such patents.

The undersigned Inventor agrees to execute all papers pertaining to prosecution of a patent application for the Invention, including the originally filed application and any other Related Application, and also to execute separate assignments in connection with Related Applications as the Assignee may deem necessary or expedient. The undersigned Inventors agrees to execute all papers and documents and to perform any act which may be necessary in connection with claims or provisions of the International Convention for the Protection of Industrial Property or similar agreements.

The undersigned Inventor hereby authorizes and requests the Patent and Trademark Office Officials in the United States of America and in any foreign countries to issue any and all Letters Patents resulting from said application or any continuing, divisional conversion, reissue application, or other Related Applications thereof to the Assignee, as Assignee of the entire interest, and hereby

covenants that the Inventors has the full right to convey the entire interest herein assigned, and will not execute any agreement in conflict herewith.

The undersigned Inventor hereby grants any patent practitioner with power of attorney in the Related Applications the authorization to insert on this Assignment any further identification which may be necessary or desirable in order to comply with the rules of the U.S. Patent and Trademark Office for recordation of this document (e.g., to insert the serial number of the application or patent number of a granted patent).
