The above-named inventor having executed Assignments to Assignee on the dates indicated in Schedule A ("Previous Assignments"), but wherein the Assignee was mistakenly identified as either Greenheat Technologies, LLC or Flatwork Technologies, LLC rather than 417 and 7/8, LLC, said Previous Assignments being recorded in the United States Patent and Trademark Office at the reels and frames indicated in Schedule A, and in order to correct said Previous Assignments, does execute this Assignment Nunc Pro Tunc as of the effective date set forth herein.

My entire right, title and interest in the inventions in the above-identified United States patent applications, and in all divisions, continuations and continuations-in-part of the applications, or reissues or extensions of Letters Patent or Patents granted thereon, and in all corresponding applications filed in countries foreign to the United States, and in all patents issuing thereon in the United States and foreign countries.

The right to file foreign patent applications on the inventions in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

All claims for damages and all of the remedies arising out of any infringement of the inventions or the above-identified United States patent applications which may have accrued prior to the date of this assignment or may accrue, including, but not limited to, the right to sue for and collect and retain damages for past infringements of the inventions or the above-identified United States patent applications.

I hereby authorize and request the United States Commissioner of Patents and Trademarks and such Patent Office officials in foreign countries as are duly authorized by their patent laws to issue patents to issue any and all patents on the inventions to Assignee as the owner of the entire interest, for the sole use of Assignee, its successors, assigns and legal representatives.

I hereby agree, without further consideration and without expense to me, to sign all lawful papers and to perform all other lawful acts which Assignee may request of me to make this Assignment fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, substitute, reissue and other United States and foreign patent applications on the inventions, and all lawful documents requested by Assignee to further the prosecution of any of such patent applications.

Cooperation to the best of my abilities in the execution of all lawful documents, the production of evidence, nullification, reissue, extension or infringement proceedings involving the inventions.

This assignment and agreement shall be effective as to each of the patent applications listed in Schedule A as of the respective filing dates thereof. Further, this assignment and agreement shall be binding upon my heirs and legal representatives.
