**ASSIGNMENT OF PATENT RIGHTS
AND PATENT APPLICATIONS**

This Agreement is made as of the 23rd day of March, 2012 by and between **Wright Medical Technology, Inc.**, a Delaware corporation having a place of business at Arlington, Tennessee ("Assignor") and **Applied Tissue Technologies LLC**, a Massachusetts limited liability company having a place of business at Wellesley Hills, Massachusetts ("Assignee").

WHEREAS, Assignor and Assignee here desire to formalize for recordation purposes a prior agreement between the parties transferring from Assignor to Assignee all worldwide rights, title, and interest in the patents identified in Appendix A and the Patent Applications identified in Appendix B attached hereto, whether now formally pending, granted, or abandoned, and in and to the inventions described in said patents and patent applications (the rights in said patents and applications and the inventions described in said patents and applications are hereinafter collectively referred to as "the Worldwide Rights");

WHEREAS, Assignor represents and warrants that it is the sole assignee of and holds good and marketable title to all the Worldwide Rights;

WHEREAS, Assignor represents and warrants that said title to the Worldwide Rights is free and clear of any and all liens and encumbrances, charges or impositions; and that it is free to convey Assignor's entire interest in said title to Assignee without the consent of any third party;

WHEREAS, Assignor represents and warrants that it holds no patents or patent applications other than said patents, and that it has no knowledge of any patent or patent application which may be interpreted to exclude making, using, or selling products embodying the Worldwide Rights;

WHEREAS, Assignee is desirous of acquiring the entire right, title, and interest in and to the Worldwide Rights;

WHEREAS, Assignor desires to grant said entire right, title, and interest in and to the Worldwide Rights to Assignee;

NOW, THEREFORE, for good and valuable consideration, receipt whereof by Assignor is hereby acknowledged, Assignor hereby sells, assigns and transfers unto Assignee, its successors and assigns, the entire right, title and interest throughout the United States of America and the territories thereof, including the right to sue for past infringements, for all foreign countries and under all international agreements, in and to the Worldwide Rights specifically including said patents and applications and the inventions described in said patents and applications, all other applications hereafter filed in the United States, in any other country, or under any international agreement based in whole or in part on said inventions, and all Letters Patent granted upon said applications by the United States, by any other country or under any international agreement, and Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks to issue said Letters Patent to Assignee or Assignee's assigns. Assignor further grants to Assignee, its successors and assigns, the right to claim for any of said applications the full benefits and priority rights of any international agreement between the United States and any foreign country or countries or between any other countries.

Assignor hereby warrants that it has the full right to make the conveyance herein, and hereby covenants that it, its legal representatives, successors and assigns, will, when requested, communicate to Assignee, its representatives, successors and assigns, all facts known respecting said inventions, execute all divisional, continuing, reissue, reexamination and foreign or international applications, together with individual

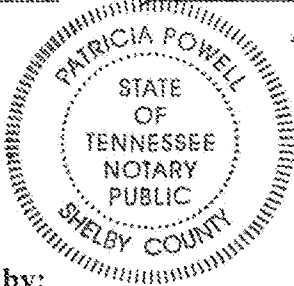

assignments therefore, make all rightful oaths, sign all lawful papers, testify in any legal proceeding and generally do everything possible to aid Assignee, its successors and assigns, in the enforcement of said patents and applications and the obtaining of any subsequent patents.

IN WITNESS WHEREOF, a duly authorized Officer of Assignor has caused this Agreement to be executed on the date first stated above.
