Pursuant to the terms of (a) that certain Pledge and Security Agreement dated as of March 1, 2012 (as the same may be amended and in effect from time to time, the "US Pledge and Security Agreement") among the grantors party thereto from time to time (the "US Pledge and Security Grantors") in favor of the Collateral Agent for the ratable benefit of the Secured Parties and (b) that certain Security Agreement dated as of March 1, 2012 (as the same may be amended and in effect from time to time, the "Canadian Security Agreement"; and together with the US Pledge and Security Agreement, the "Security Agreement") among the grantors party thereto from time to time (the "Canadian Security Grantors"; and together with the US Pledge and Security Grantors, the "Security Grantors") in favor of the Collateral Agent for the ratable benefit of the Secured Parties, the Security Grantors have granted a security interest in the Collateral, including, without limitation, all right, title and interest of each Grantor in, to, and under all now owned and hereafter acquired Patent and Trademark Collateral (as defined below), set forth on Schedule I attached hereto, to secure the payment of all Secured Obligations.

Agreement

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each Grantor hereby grants to the Collateral Agent for the ratable benefit of the Secured Parties a security interest in all its right, title, and interest in, to,

and under the following, whether presently existing or hereafter created or acquired (the "Patent and Trademark Collateral"):

(a) (i) all letters patent throughout the world, all registrations and recordings thereof and all applications for letters patent throughout the world, including registrations, recordings and pending applications in the United States Patent and Trademark Office, (ii) all reissues, divisions, continuations, continuations-in-part, extensions, renewals or reexaminations thereof and the inventions disclosed or claimed therein, including the right to make, have made, use, sell, offer to sell, and import into the United States, the inventions disclosed or claimed therein; including but not limited to all the property set forth as "Patents" on Schedule I hereto, and (iii) all patent licenses, and other agreements providing any Grantor with the right to use any items of the type referred to in clauses (i) and (ii) above;

provided that in no event shall the term "Patent and Trademark Collateral" include any asset or property of any Grantor which would be rendered void or voidable, or which if included in Patent and Trademark Collateral would violate, be prohibited by, or constitute a default under any agreement, contract, document or law relating thereto, would require any consent which has not been obtained, or would result in the incurrence or imposition of any penalty upon such Grantor or any Subsidiary as a result of a grant of a security interest in such asset or property.
