**PATENT SECURITY AGREEMENT**

**PATENT SECURITY AGREEMENT**, dated as of April 17, 2012 (this "Agreement"), between APPLIED MEDICAL RESOURCES CORPORATION, a California corporation (the "Assignor"), in favor of Citibank, N.A. (the "Assignee"), as administrative agent for various financial institutions (collectively, the "Lenders") providing financing for the Assignor.

**W I T N E S S E T H:**

**WHEREAS**, the Assignor holds all right, title and interest in and to the patents, patent applications and patent licenses listed on Annex I attached hereto, which patents, patent applications and patent licenses are registered or applied for in the United States Patent and Trademark Office (collectively, the "Scheduled Patents");

**WHEREAS**, the Assignor, has entered into a Security Agreement, dated as of April 17, 2012 (the "Security Agreement"), in favor of the Assignee, for its benefit and the benefit of the Lenders and other secured parties (collectively, the "Secured Parties");

**WHEREAS**, pursuant to the Security Agreement, the Assignor has assigned to the Assignee and granted to the Assignee, for the benefit of the Secured Parties, a continuing security interest in (a) all letters patent and applications for letters patent throughout the world, including each patent and patent application referred to in Item A of Annex I attached hereto (as such Annex may be amended or supplemented from time to time); (b) all patent licenses, including each patent license referred to in Item B of Annex I attached hereto (as such Annex may be amended or supplemented from time to time); (c) all reissues, divisions, continuations, continuations-in-part, extensions, renewals and reexaminations of any of the items described in clauses (a) and (b) above; and (d) all proceeds of, and rights associated with, the foregoing (including license royalties and proceeds of infringement suits), the right to sue third parties for past, present or future infringements of any patent or patent application, including any patent or patent application referred to in Item A of Annex I attached hereto (as such Schedule may be amended or supplemented from time to time), and for breach or enforcement of any patent license, including any patent license referred to in Item B of Annex I attached hereto (as such Annex may be amended or supplemented from time to time), and all rights corresponding thereto throughout the world (collectively, the "Collateral"), to secure the payment, performance and observance of the Secured Obligations (as defined in the Security Agreement);

**NOW, THEREFORE**, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Assignor and the Assignee hereby agrees as follows:

(a) The Assignor does hereby pledge and collaterally assign unto the Assignee and grants to the Assignee, for the benefit of the Secured Parties, a continuing security interest in the Collateral to secure, for the benefit of the Secured Parties, the prompt payment and performance of the Secured Obligations.

(b) The Assignor does hereby further acknowledge and affirm that the rights and remedies of the Assignee with respect to the Collateral are more fully set forth in the Security Agreement, the terms and provisions of which are hereby incorporated herein by reference as if fully set forth herein.

(c) This Agreement may not be amended, restated or otherwise modified except in accordance with the terms of the Security Agreement, pursuant to which the Assignor may modify this Agreement (after obtaining the Assignee's approval) by amending Annex I attached hereto to include reference to any right, title or interest of the Assignor in any additional Patents or to delete any reference to any Scheduled Patents in which the Assignor no longer has any right, title or interest.

(d) This Agreement shall be governed by and construed in accordance with the internal laws of the State of New York.

(e) This Agreement shall be binding upon and inure to the benefit of the Assignor and the Assignee and their respective successors and assigns.

(f) This Agreement may be executed in any number of counterparts, each of which shall constitute an original and all of which when taken together shall constitute one and the same Agreement.
