ASSIGNMENT OF U.S. RIGHTS TO INVENTION  
AND CORRESPONDING PATENT RIGHTS

The Assignor Herbert Rüger (the "Assignor"), a German citizen and a resident of Germany, has co-invented an invention entitled "Forming Machine for Forging, in Particular Stretch-Forging, Workpieces" (the "Invention") for which a U.S. utility patent application was filed on \_\_\_\_\_, 2012 and assigned Serial No. \_\_\_\_\_. Assignee is desirous in obtaining ownership in Assignor's entire U.S. rights to and in the Invention and any U.S. patent rights emanating therefrom.

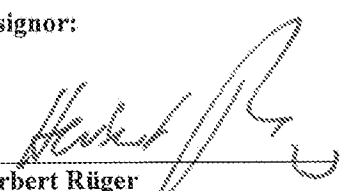

For good and valuable consideration, the sufficiency of which is hereby acknowledged, the Assignor hereby assigns his entire U.S. right, title, and interest in the Invention, and any U.S. patent rights emanating therefrom, including any divisional, continuation, continuation-in-part, substitution, reissue, reexamination, and U.S. patents that issue from same to the Assignee; and Assignor hereby requests that the U.S. Director of Patents and Trademarks issue any U.S. patent directly to the Assignee.

Assignor warrants that no assignment, sale, agreement or encumbrance has been or will be made or entered into that would conflict with this Assignment.

Assignor further agrees that it will, upon request by Assignee, but at Assignee's expense, promptly provide Assignee with all pertinent facts and documents relating to the Invention, and any and all patent applications or patents, both foreign and domestic, as may be known and accessible to the Assignor; and that Assignor will testify to same in any interference, opposition, or litigation related thereto, and will promptly execute and deliver to Assignee or its legal representative any and all papers, instruments, affidavits and/or declarations required to apply for, obtain, maintain, and enforce any U.S. application or U.S. patent corresponding to the assigned U.S. rights in and to the Invention.
