PATENT

U.S. PATENT ASSIGNMENT

THIS U.S. PATENT ASSIGNMENT ("Assignment") is effective this 18th day of May 2012 ("Effective Date"), from CSR plc, a United Kingdom corporation ("Assignor"), to CSR Technology Inc., a Delaware corporation ("Assignee").

WHEREAS, Assignor is the owner of record of a certain United States patent and related rights;

WHEREAS, Assignee is an indirect wholly-owned subsidiary of Assignor, and Assignor now desires to transfer beneficial and record ownership of and legal title in a certain United States patent and related rights to Assignee;

NOW, THEREFORE, Assignor agrees to assign and hereby assigns, transfers and conveys to Assignee, its successors, assigns and nominees forever, without any restrictions, reservations or limitations, all of Assignor's exclusive entire right, title and interest in, to and under the following:

The U.S. patent listed on Schedule A annexed hereto, and any and all discoveries, processes, machines, manufactures, compositions of matter, inventions, ideas, concepts, developments, formulae, designs, methods, techniques, procedures, and new and useful improvements reflected therein (the entirety of the above, hereinafter the "Patent");

Any and all other rights, priorities and privileges provided under United States, state or foreign law, or multinational law, compact, treaty, protocol, convention or organization, with respect to the foregoing Patent ("Related Rights");

Any and all rights to sue at law or in equity for any infringement or other unauthorized use or conduct in derogation of the Patent and Related Rights occurring prior to the execution of this Assignment, including the right to receive all proceeds and damages therefrom and the right to sue for past infringement, if any, and all rights pursuant to 35 U.S.C. §154; and

Any and all letters patent which may be granted on the Patent and Related Rights in the United States and its territorial possession and in any and all foreign countries and in and to any and all divisions, continuations, substitutions, renewals, re-examinations, extensions and reissues thereof, and any other applications claiming priority thereto.

Assignee, its successors and assigns, shall hold the rights to the foregoing for and during the existence of such Patent and Related Rights and all reissues thereof, as fully and as entirely as the same would have been held and enjoyed by Assignor had this Assignment not been made.

This Assignment is effective as of the Effective Date. Assignor shall, without further consideration, comply with a request by Assignee to execute promptly any additional documents and to take promptly any further action necessary to protect, secure and vest good, valid and marketable title to the Patent and Related Rights in Assignee in all applicable jurisdictions, and to record this Assignment with all appropriate authorities.

IN WITNESS WHEREOF, the undersigned has caused this Assignment to be duly executed and delivered as of the date above first written.
