## PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "**Assignment**") is made effective as of February 29, 2012, by and between Gristmill Ventures, LLC, a California limited liability ("Seller"), and Secure Content Storage Association, LLC, a Delaware limited liability company ("**Buyer**"), with reference to the SNAP Technology Asset Purchase Agreement (the "**Agreement**"), dated as of the date hereof, by and among Seller, Buyer, Warren Lieberfarb, Jeff Lotspiech, Amir Majidimehr, Ken Goeller, Aaron Marking and Howard Osa.

WHEREAS, Seller owns all of the patents, including patent applications, identified in Schedule A hereto, together with the inventions described or claimed therein (the "**Assigned Patents**");

WHEREAS, Seller desires to assign to Buyer all the right, title and interest of Seller in and to the Assigned Patents, and Buyer desires to accept such assignment;

WHEREAS, Section 3.2(a) of the Agreement requires Seller to deliver at the Closing (as defined in the Agreement) such further documents as might be required to reflect Seller's assignment to Buyer of the Assigned Patents; and

WHEREAS, Seller and Buyer accordingly wish to execute this recordable instrument, assigning all of Seller's right, title and interest in and to the Assigned Patents to Buyer.

NOW, THEREFORE, for valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Seller and Buyer agree as follows:

1. Seller does hereby sell, assign, convey, deliver, transfer and set over, unto Buyer, its successors, legal representatives and assigns, the entire right, title and interest throughout the world in, to and under the Assigned Patents, and the inventions disclosed therein, and all divisions, renewals and continuations thereof; and all Letters Patent which may be granted thereon and all reissues and extensions thereof, all applications for Letters Patent which have been filed claiming priority to the Assigned Patents in any country, and all Letters Patent which have been or may hereafter be granted for said patents in any country; and all rights of priority under International Conventions (under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Conventions, and all other treaties of like purposes ), and all income, royalties, license fees and payments now or hereafter due or payable with respect thereto, as well as all rights to any actions, causes of action and rights to recover damages and payments for past, present or future infringements or misappropriations thereof.

2. Seller hereby authorizes and requests the Commissioner of Patents of the United States and any Official of any country or countries foreign to the United States, whose duty it is to issue Patents on applications as aforesaid, to record Buyer as the assignee and owner of the Patents and to issue all Letters Patent to the Buyer, its successors, legal representatives and assigns, in accordance with the terms of this instrument.

3. Seller and Buyer agree that (i) this Assignment is subject to the terms and conditions of the Agreement, (ii) this Assignment shall not be deemed to limit, enlarge or

extinguish any obligation of Seller or Buyer under the Agreement, all of which obligations shall survive the delivery of this Assignment in accordance with the terms of the Agreement, and (iii) to the extent there is any conflict between this Assignment and the terms and conditions of the Agreement, the Agreement shall control.

4. This Assignment may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.
