**ASSIGNMENT**

WHEREAS, Assignor, GREENHEAT TECHNOLOGIES, LLC, a Utah limited liability corporation, having a principal place of business at 1997 West 5070 South, Salt Lake City, Utah 84104, is the owner of record of United States Patent Application Serial No. 12/433,974, filed on May 1, 2009, entitled PALLET WARMER HEATING UNIT, and now identified as File No. 17460.18.1.1 of the law firm of Workman Nydegger, 1000 Eagle Gate Tower, 60 East South Temple, Salt Lake City, Utah 84111.

WHEREAS, Assignee, 417 AND 7/8, LLC, a Utah limited liability corporation, having a principal place of business at 155 Crestview Drive, Park City, Utah 84098, desires to secure the entire right, title and interest in the above-identified patent application.

WHEREAS, David Naylor and Thomas Caterina, the inventors of the above-identified patent application, executed an Assignment on August 18, 2009, which mistakenly identified the assignee as Greenheat Technologies, LLC rather than 417 and 7/8, LLC, said Assignment being recorded in the United States Patent and Trademark Office at Reel 023113 on Frame 0297, and in order to correct said Assignment, Assignor executes this Assignment Nunc Pro Tunc as of the effective date set forth herein.

THEREFORE, in exchange for good and valuable consideration paid to Assignor by Assignee, the receipt and sufficiency of which we hereby acknowledge, ASSIGNOR HEREBY ASSIGNS TO ASSIGNEE:

The entire right, title and interest in the invention in the above-identified United States patent application, the above-identified United States patent application, and in all divisions, continuations and continuations-in-part of the application, or reissues or extensions of Letters Patent or Patents granted thereon, and in all corresponding applications which may be filed in countries foreign to the United States, and in all patents issuing thereon in the United States and foreign countries.

The right to file foreign patent applications on said invention in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International convention for such applications.

All claims for damages and all of the remedies arising out of any infringement of the invention or the above-identified United States patent application which may have accrued prior to the date of this assignment or may accrue, including, but not limited to, the right to sue for and collect and retain damages for past infringements of the invention or the above-identified United States patent application.

Assignor hereby authorizes and requests the United States Commissioner of Patents and Trademarks and such Patent Office officials in foreign countries as are duly authorized by their patent laws to issue patents to issue any and all patents on said invention to the Assignee as the owner of the entire interest, for the sole use of Assignee, its successors, assigns and legal representatives.

Assignor hereby agrees, without further consideration and without expense, to sign all lawful papers and to perform all other lawful acts which Assignee may request of Assignor to make this Assignment fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, substitute, reissue and other United States and foreign patent applications on the invention, and all lawful documents requested by Assignee to further the prosecution of any of such patent applications.

Cooperation to the best of Assignor's ability in the execution of all lawful documents, the production of evidence, nullification, reissue, extension or infringement proceedings involving the invention.

This assignment and agreement shall be effective as of August 18, 2009.
