ASSIGNMENT OF INVENTION

WHEREAS, I, THOMAS CORBET ELLIS, residing at 204 Breckenridge Road, RD3, Napier, New Zealand, have invented with joint inventors certain new and useful improvements for a ROOF TRUSS, for which I have made patent applications identified in Schedule A hereto (hereinafter "Patent Applications"); and

WHEREAS, SCOTTSDALE CONSTRUCTION SYSTEMS LIMITED, a company of New Zealand, with offices in Napier, New Zealand, hereinafter called the "Assignee," desires to acquire all right, title and interest in and to said invention and patent applications within all countries throughout the world, and any Letters Patent that may be granted therefore;

NOW, THEREFORE, for good and valuable consideration, including salary or payment for the making of inventions, or employee benefits, the receipt of which is hereby acknowledged, and with the intention of being legally bound hereby, I confirm that I have sold, assigned and transferred, and do hereby sell, assign and transfer to said Assignee my entire right, title and interest in and to my invention and patent applications within any and all countries throughout the world and applications filed under any international convention, and in and to any Letters Patent of the United States and any and all other countries throughout the world that may be granted therefor, including all related divisions, continuations, continuations-in-part, substitutes, patents of addition, reissues, reexaminations, renewals and extensions thereof, and the right to apply for Letters Patent in any and all countries with full benefit of such priorities as may now or hereafter be granted to me by local laws or by treaty, including any international convention for the protection of industrial property, together with the right to extend the protection of said any United States Letters Patent to the various territorial possessions now owned or which may be hereafter acquired by the United States of America, all said rights to be held and enjoyed by the Assignee for its use and benefit and for the use and benefit of its successors or assigns, to the full end of the term for which said Letters Patent may be granted, as fully and entirely as the same would have been held and enjoyed by me if this assignment and sale had not been made. And I do hereby request and authorize the United States Commissioner of Patents and Trademarks, and any officials of other countries whose duty it is to issue patents on applications as aforesaid, to issue all said Letters Patent, when granted, in accordance with the terms of this assignment.

I further covenant and agree with the Assignee that subject to rights that may be held by joint inventors I have full and unencumbered title to the invention and patent applications herein assigned, which title I warrant unto the Assignee, and I further agree that, when requested, I will, without demanding any further consideration therefor but at the expense of Assignee, do all lawful and just acts, including the execution and acknowledgement of instruments, that may be or become necessary for obtaining, sustaining or reissuing Letters Patent of any country for the said invention and patent application, and for maintaining and perfecting the Assignee's right to said invention, patent applications and Letters Patent particularly in cases of interference and litigation.

IN WITNESS WHEREOF, I, the said Thomas Corbet Ellis have unto set my hand and have executed this Assignment under seal.
