CONFIRMATORY ASSIGNMENT

THIS CONFIRMATORY ASSIGNMENT (the "Assignment"), which confirms an assignment which took place on September 5, 2006, and effective as of that day, is made by and between Bastien Pesenti (the "Assignor"), and Geometrix Inc., a corporation organized under the laws of California (the "Assignee").

In consideration of the value received and the mutual covenants of the parties, the receipt and sufficiency of which is hereby acknowledged, Assignor and Assignee agree as follows:

1. Background. Assignor assigned his entire interest in the invention disclosed in US patent entitled "Method and apparatus for generating 3D face models from one camera", US Patent no. 7,103,211 issued September 5, 2006 (the "Patent"), together with the goodwill associated therewith, to the Assignee on September 5, 2006. Assignor now confirms his assignment of the Patent to Assignee and Assignee confirms that it accepted such assignment on the terms and conditions set forth in this Assignment.

2. Grant. For good and valuable consideration, receipt of which is hereby acknowledged, Assignor confirms that he has sold, assigned and transferred, and, by these presents does hereby sell, assign and transfer to Assignee, its successors and assigns, for the territory of the United States of America and the entire world, his entire right, title and interest in and the Patent, and any reissues and extensions thereof, which issue or have issued in any country upon patent applications which correspond with or claim priority from any of such applications or patents or any divisional, continuation-in-whole, or continuation-in-part thereof, including the right to sue and collect for past, present, and future infringement; the same to be held and enjoyed by Assignee for its own use, and for the use of its legal representatives, to the full term for which such patents have been granted as fully and entirely as the same would have been held by Assignor had this assignment not been made.

Assignor does hereby further covenant and agree that he will not execute any writing or do any act whatsoever conflicting with the Patent, and that Assignor, its successors and assigns, will at any time upon request without further additional consideration, but at the expense of Assignee, its successors and assigns, execute such additional writings and do such additional acts as Assignee, its successors and assigns, may determine as necessary or desirable in the enjoyment of this grant, and in any proceedings or transactions involving such inventions, patent applications or patents.

3. Recordal. To the extent required under applicable law or otherwise necessary, Assignor herewith authorizes Assignee to apply for the recordal of the assignment of the Patent and to request the patent offices in the territories concerned to issue to the Assignee any and all documents covering the Patent.

IN WITNESS WHEREOF, Assignor has caused this Confirmatory Assignment to be executed as of the Effective Date.
