## ASSIGNMENT

The following inventors ("Assignors") have invented certain improvements in an **Chemical Release System** and filed on December 10, 2009 a U.S. non-provisional patent application, serial number **12/635,506** (collectively the "Invention"):

**Terry Residential Inc. dba nuvoH2o** ("Assignee"), a corporation of Utah whose address is 6740 South 1300 East, STE 200, Salt Lake City, UT 84121, desires to acquire the entire right, title and interest in the Invention, and to any United States and foreign patents to be obtained from the Invention.

Accordingly, for \$8,922.00 and other good and valuable consideration, the receipt and sufficiency of which we acknowledge, Assignors hereby: 1) sell, assign, and transfer to Assignee, its successors and assigns, the entire right, title and interest in the Invention, including any divisions, continuations, and continuations-in-part of the above-identified application, and in and to any and all Letters Patent of the United States and foreign countries which may be granted or have been granted for the Invention, and in and to any and all reissues, reexaminations, extensions, or counterparts of the above-identified application, and in and to any and all priority rights, Convention rights, and other benefits accruing or to accrue to us with respect to the filing of applications for patents or securing of patents in the United States and foreign countries; 2) authorize and request the Commissioner of Patents to issue any and all such Letters Patent granted upon the Invention to Assignee, its successors and assigns; and 3) agree that Assignee may apply for foreign Letters Patent on the Invention.

Assignors warrant and covenant that they have the full and unencumbered right to sell, assign, and transfer the interests hereby sold, assigned, and transferred and that they have not executed and will not execute any document or instrument in conflict with this Assignment.
