WHEREAS, the Assignor has invented a new design entitled DIGITAL DISPLAY for which an application for a United States Design Patent will be filed substantially contemporaneously with the filing of this Assignment (the "Design");

WHEREAS, the Assignor believes himself to be the original, first and joint inventor and author of the Design;

WHEREAS, the Assignee desires to acquire by formal, recordable assignment the entire worldwide right, title and interest in and to the Design, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent that may be granted for the Design in the United States, Canada, or anywhere else throughout the world;

NOW, THEREFORE, in consideration of the sum of Ten Dollars (\$10.00) and of other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Assignor hereby sells, assigns and transfers to the Assignee, the entire

Further, the Assignor agrees that, upon request and without further compensation, but at no expense to the Assignor, he and his legal representative(s) and assigns will do all lawful acts, including the execution of papers and the giving of testimony, that may be necessary or desirable for obtaining, sustaining, reissuing or enforcing any utility patent, design patent, industrial design, design right, utility model or petty patent as may issue anywhere in the world for the Design, and for perfecting, recording or maintaining the title of the Assignee, its successors and assigns, to the Design, said applications, and any utility patent, design patent, industrial design, design right, utility model or petty patent granted for the Design in the United States, Canada, or anywhere in the world.

The Assignor represents and warrants that he has not granted and will not grant to any other any rights inconsistent with the rights granted herein.

The Assignor authorizes and requests the Director or Commissioner of Patents and Trademarks, as the case may be, of the United States, Canada and of all foreign countries to issue any utility patent, design patent, industrial design, design right, utility model, or petty patent granted for the Design, whether on said applications or on any subsequently

filed division, continuation, continuation-in-part or reissue application, to the Assignee, its successors and assigns, as the assignee of the entire interest in the Design.
