PATENT ASSIGNMENT

This PATENT ASSIGNMENT is made as of July 20, 2012 (this "Assignment"), by Focus Products Group, LLC, an Illinois limited liability company (the "Assignor"), and FPG, LLC, an Illinois limited liability company (the "Assignee"). Capitalized terms used but not otherwise defined herein are intended to have the meanings set forth in the Asset Purchase Agreement (as defined below).

WHEREAS, the Assignor is the owner, subject to any right, title and interest of the Agent (as defined below) in the Assigned Patents (as defined below) for the ratable benefit of the Secured Lender Parties (as defined below) and further subject to the co-ownership of TML, Inc. of two of the Assigned Patents as set forth on Schedule A, of all right, title and interest in and to the patents and patent registrations and applications identified on the attached Schedule A (collectively, the "Assigned Patents").

WHEREAS, in connection with that certain Second Amended and Restated Credit Agreement, dated as of October 16, 2009 (as amended, restated, supplemented or otherwise modified from time to time, the "Credit Agreement"), by and among Bank of America, N.A., as administrative agent and collateral agent (the "Agent") for the lender parties (collectively, the "Secured Lender Parties"), the Assignor and the other Secured Lender Parties, the Agent, the Assignor and certain of the Company Parties entered into that certain Patent Security Agreement, dated as of October 16, 2009 (the "Security Agreement"), pursuant to which the Agent, for its benefit and the ratable benefit of each Secured Lender Party, was granted a continuing security interest in all of the Company Parties' right, title and interest throughout the world, whether now or hereafter exiting or acquired, in and to the patents and patent registrations and applications of the Company Parties (the "Company Patents");

WHEREAS, the Assignor understands that pursuant to the terms of that certain Asset Purchase Agreement (the "Asset Purchase Agreement"), dated as of July 20, 2012, the Agent sold, assigned, transferred, conveyed and delivered to the Assignee pursuant to a private sale in accordance with Article 9 of the Uniform Commercial Code, as adopted in the State of Illinois, all of the Company Parties' right, title and interest in and to the Acquired Assets, including the Assigned Patents, wherever located, whether tangible or intangible, as the same shall exist on the Closing.

WHEREAS, the Assignor understands that pursuant to the terms of that certain Release of Patent Security Agreement dated as of July 20, 2012 and entered into in connection with the Asset Purchase Agreement, the Agent released all of its security interest under the Security Agreement in and to the Company Patents and dissolved any and all of its liens and encumbrances respecting the Company Patents.

WHEREAS, in accordance with the terms of that certain Side Agreement, dated as of July 20, 2012, by and between the Company Parties and the Assignee, the Assignor desires to execute and deliver this Assignment in order to effectuate the sale, assignment, transfer, conveyance and delivery to the Assignee of all worldwide rights, title and interest in and to the Assigned Patents.

NOW, THEREFORE, FOR VALUE RECEIVED, the Assignor does hereby assign, sell and transfer to the Assignee, subject to any right, title and interest of the Agent in the Assigned Patents for the ratable benefit of the Secured Lender Parties and further subject to the co-ownership of TML, Inc. of two of the Assigned Patents as set forth on Schedule A, all of its right, title and interest in and to the Assigned Patents, and such patents as may issue thereon or claim priority under United States law or international convention, including but not limited to non-provisionals, continuations, divisionals, reissues, reexaminations, extensions, and substitutions of the Assigned Patents, and any right, title and interest the Assignor may have in provisional applications to which any Assigned Patents claim priority, together with all rights of action accrued, accruing and to accrue under and by virtue hereof, including all right to sue or otherwise recover for past infringement and to receive all damages, payments, costs and fees associated therewith, free and clear of all liens and encumbrances; said Assigned Patents to be held and enjoyed by the Assignee for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which the Assigned Patents may be granted as fully and entirely as the same would have been held by the Assignor had this assignment not been made; the Assignor hereby conveys all of its rights arising under or pursuant to any and all United States laws and international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for the Assigned Patents. The Assignor hereby acknowledges that this assignment, being of its entire right, title and interest in and to the Assigned Patents, carries with it the right in the Assignee to apply for and obtain from competent authorities in all countries of the world any and all Assigned Patents by attorneys and agents of the Assignee's selection and the right to procure the grant of all Assigned Patents to the Assignee in its own name as assignee of the Assignor's entire right, title and interest therein;

AND, the Assignor hereby further agrees for itself and its executors and administrators to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary to secure fully the Assigned Patents to the Assignee, its successors, assigns, and legal representatives, but at its or their expense and charges, including the execution of non-provisional, substitution, continuation, divisional, reissue, reexamination, or corresponding foreign or international patent applications;

AND, the Assignor hereby further agrees, at the Assignee's expense and charges, to provide statements or testimony in any interference or other proceeding in which the Assigned Patents may be involved;

AND, the Assignor hereby authorizes and requests the Director of the United States Patent and Trademark Office to issue such patents as shall be granted upon the Assigned Patents to the Assignee, its successors, assigns, or legal representatives.

The Assignor agrees to execute, and to cause any of the other Company Parties to execute, such additional documents as the Assignee deems reasonably necessary to enable the Assignee to record this Assignment in the Assignee's name in any country throughout the world.

This Assignment may be executed in any number of counterparts, all of which taken together shall constitute one and the same instrument and any of the parties hereto may execute this Assignment by signing any such counterpart.

The undertakings, covenants and agreements set forth herein shall be binding upon and inure to the benefit of the Assignee and the Assignor and their respective successors and assigns.
