ASSIGNMENT OF INVENTIONS, PATENTS, PATENT APPLICATIONS,
TRADEMARKS AND COPYRIGHTS

WHEREAS, CONEXANT SYSTEMS, INC. ("Assignor"), a Delaware corporation with an office at 4311 Jamboree Road, Newport Beach, California 92680-3335, owns or has rights to certain inventions, patents, patent applications, trademarks and copyrights identified in the attached Schedule entitled "IP SCHEDULE 101.1(d)"

WHEREAS, MINDSPEED TECHNOLOGIES, INC. ("Assignee"), a Delaware corporation with an office at 4000 MacArthur Blvd., Newport Beach, California 92680-3335, wishes to acquire full rights and ownership of said inventions, patents, patent applications, trademarks and copyrights.

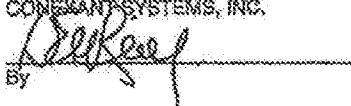

Assignor's

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor grants, conveys, assigns and transfers to the Assignee and the Assignee's successors and assigns, Assignee's entire right, title and interest in and to said inventions, patents, patent applications and associated invention disclosures of the same, trademarks, together with the good will of the business symbolized by the mark, and copyrights listed on the attached Schedule identified as "IP SCHEDULE 101.1(d)", including all corresponding applications such as continuations, continuations-in-part, divisionals, provisos, reissues, reexaminations thereof and the subject matter of any and all claims which may be obtained in every such patent, as well as all corresponding foreign patents, foreign patent applications, foreign trademarks registrations, foreign trademark applications in whatever jurisdictions in which the same exist along with all rights of priority and the right to file applications for patents, trademarks and copyrights based thereon and to prosecute such applications and receive patents, trademark registrations and copyright registrations thereon in its own name, all of the same to be held and enjoyed by the said Assignee, its successors, assigns or other legal representatives, for its own use and advantage, and for the use and advantage of its successors, assigns or other legal representatives, to the end of the term or terms for which patents, trademark registrations and copyright registrations are or may be granted, re-issued or re-examined, as fully and entirely as the same would have been held and enjoyed by Assignor had this assignment not been made, including all rights to profits and damages by reason of past infringement by any party or parties, with the right to sue and collect the same for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, along with any and all of Assignor's rights under the assigned copyrights to publish, reproduce, display, transmit, adapt, sell, prepare derivative works, distribute, perform or otherwise make use of such assigned work or portions thereof throughout the world in any form or medium, and in any language, and to license the assigned copyrights to others, for the entire term of copyright, including any renewals and extensions. Where permitted by law, Assignor waives any applicable moral rights.

UPON SAID CONSIDERATION, Assignor appoints Assignee and Assignee's successors and assigns as its attorney-in-fact to act in Assignor's name and place to execute, deliver and record any document or instrument of assignment or conveyance necessary to perfect, grant, and confirm the rights granted herein, and Assignor conveys to the Assignee the right to make application, prosecute, receive and enforce in its own behalf and name the inventions, patents, patent applications and trademarks of "IP SCHEDULE 101.1(d)" in the United States and all foreign countries and to claim priority therefrom under the Patent Cooperation Treaty, the International Convention and/or any other international arrangement.

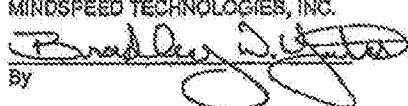

IN WITNESS WHEREOF, Assignor and Assignee have caused this Assignment to be duly executed by one of its officers on the date shown below.

ASSIGNMENT OF INVENTIONS, PATENTS, PATENT APPLICATIONS,
TRADEMARKS AND COPYRIGHTS

WHEREAS, CONEXANT SYSTEMS, INC. ("Assignor"), a Delaware corporation with an office at 4311 Jamboree Road, Newport Beach, California 92660-3095, owns or has rights to certain inventions, patents, patent applications, trademarks and copyrights identified in the attached Schedule entitled "IP SCHEDULE 101.1(d)";

WHEREAS, MINDSPEED TECHNOLOGIES, INC. ("Assignee"), a Delaware corporation with an office at 4000 MacArthur Blvd., Newport Beach, California 92660-3095, wishes to acquire full rights and ownership of said inventions, patents, patent applications, trademarks and copyrights.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor grants, conveys, assigns and transfers to the Assignee and the Assignee's successors and assigns, Assignee's entire right, title and interest in and to said inventions, patents, patent applications and associated invention disclosures of the same, trademarks, together with the good will of the business symbolized by the mark, and copyrights listed on the attached Schedule identified as "IP SCHEDULE 101.1(d)", including all corresponding applications such as continuations, continuations-in-part, divisionals, provisionals, reissues, reexaminations thereof and the subject matter of any and all claims which may be obtained in every such patent, as well as all corresponding foreign patents, foreign patent applications, foreign trademarks registrations, foreign trademark applications in whatever jurisdictions in which the same exist along with all rights of priority and the right to file applications for patents, trademarks and copyrights based thereon and to prosecute such applications and receive patents, trademark registrations and copyright registrations thereon in its own name, all of the same to be held and enjoyed by the said Assignee, its successors, assigns or other legal representatives, for its own use and advantage, and for the use and advantage of its successors, assigns or other legal representatives, to the end of the term or terms for which patents, trademark registrations and copyright registrations are or may be granted, re-issued or re-examined, as fully and entirely as the same would have been held and enjoyed by Assignor had this assignment not been made, including all rights to profits and damage by reason of past infringement by any party or parties, with the right to sue and collect the same for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, along with any and all of Assignor's rights under the assigned copyrights to publish, reproduce, display, transmit, adapt, sell, prepare derivative works, distribute, perform or otherwise make use of such assigned work or portions thereof throughout the world in any form or medium, and in any language, and to license the assigned copyrights to others, for the entire term of copyright, including any renewals and extension. Where permitted by law, Assignor waives any applicable moral rights.

UPON SAID CONSIDERATION, Assignor appoints Assignee and Assignee's successors and assigns as its attorney-in-fact to act in Assignor's name and place to execute, deliver and record any document or instrument of assignment or conveyance necessary to perfect, grant, and confirm the rights granted herein, and Assignor conveys to the Assignee the right to make application, prosecute, receive and enforce in its own behalf and name the inventions, patents, patent applications and trademarks of "IP SCHEDULE 101.1(d)" in the United States and all foreign countries and to claim priority therefrom under the Patent Cooperation Treaty, the International Convention and/or any other international arrangement.

IN WITNESS WHEREOF, Assignor and Assignee have caused this Assignment to be duly executed by one of its officers on the date shown below.
