ASSIGNMENT

THIS ASSIGNMENT is by and between Aihua FU (the "Assignor"), and Nvigen, Inc. (the "Assignee") residing at 265 Sobrante Way, Suite H, Sunnyvale, CA 94086, United States of America.

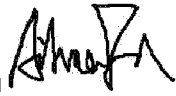

The Assignor has invented one or more certain inventions (the "Invention(s)") described in:
A U.S. Provisional Patent Application entitled "Uses of Porous Nanostructure in Delivery" which was filed on February 19, 2012 as Application No. US61/600,696 (the "696 Application");
A PCT Patent Application entitled "Uses of Porous Nanostructure in Delivery" which is filed on February 19, 2013 as Application No. PCT/US13/26756 (the "PCT Application") and claims priority of the 696 Application (the 696 Application and the PCT Application are collectively referred to as the "Applications"). The Assignor authorizes the Assignee or its representatives to insert the application number of the PCT Application when known.

The Assignee desires to acquire the entire right, title and interest in and to the Invention(s) and the Applications, and in and to any patents (collectively, "Patents") that may be granted for the Invention(s) in any and all countries and regions in the world.

To the extent that any right, title and interest in and to the Invention(s) and the patent application and patent rights related thereto resides with the Assignor under any applicable laws, and for valuable consideration, the receipt and sufficiency of which Assignor acknowledges, Assignor hereby sells, assigns, and transfers to Assignee, its successors, legal representatives and assigns, the entire right, title and interest in and to: the Invention(s), the Applications, and any Patents; any divisions, continuations, continuations-in-part of the Applications and any national phase applications of the Applications and any divisions, continuations, continuations-in-part of the national phase applications and any other application claiming priority rights from the Applications; any reissues, reexaminations, or extensions of any and all Patents; the right to file patent applications directly in the name of Assignee (in countries where such filings are permissible); and the right to claim priority rights deriving from the Applications (collectively, the "Rights"). Assignor warrants that he is the sole inventor of the Invention(s) and he has not done and will not do anything to encumber the Rights. Assignor also agrees to not sign any writing or do any act conflicting with this assignment, and, without further compensation, sign all documents and do such additional acts as Assignee deems necessary or desirable to: perfect Assignee's enjoyment of the Rights; prepare and prosecute the Applications or any other applications for Patents;

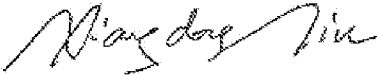

conduct proceedings regarding the Rights, including any litigation or interference proceedings; or perfect or defend title to the Rights. Assignor requests the Commissioner of Patents or any other office of similar authority to issue any Patents that may be issued on the Invention(s) to Assignee. Assignor acknowledges and agrees that Assignee shall have the rights to further assign or otherwise transfer any and all Rights to any third party and the Assignor waives any right of first refusal that he may have for acquiring such Rights in the event of such assign or transfer to a third party.
