## ASSIGNMENT AGREEMENT

This Agreement is entered into as of February 8, 2010, by Secutor Systems, Inc., a Virginia corporation ("Assignee"), and Peter P. Shiakallis ("Assignor"), an employee of the Assignee. Assignor owns and operates a multi-disciplinary business that manufactures and provides hardware and software relating to computer technology, including without limitation, the multi-domain PCs known as the DataVaultx4 3-in-1 and 2-in-1 solutions, and provides related services to its customers (the "Business").

For valuable consideration, including but not limited to, the terms and conditions of employment between Assignor and Assignee, the receipt and sufficiency of which are hereby acknowledged, Assignor agrees as follows:

1.0 Assignor has disclosed at all times, and will promptly disclose, in confidence to the Assignee all inventions, concepts, improvements, designs, know-how, original works of authorship, formulas, processes, compositions of matter, computer software programs, new product and service ideas, e-commerce products and services, related products and services, databases, mask works, and trade secrets relating to, or in any way relevant to, the Business that Assignor has conceived, made (or will make or conceive in any future employment with the Assignee), or first reduced to practice or created, either alone or jointly with others, during the period of employment, whether or not in the course of employment, and whether or not such Inventions are patentable, copyrightable, or protectable as trade secrets (the "Inventions"). By way of example and not limitation, the parties agree that such Inventions shall include those that (i) are developed using equipment, supplies, facilities or trade secrets of the Assignee, (ii) result from work performed by Assignor for the Assignee, or (iii) relate to, or are in any way relevant to, the Business or its current or anticipated research and product development. By way of further example and not limitation, the Business includes products such as work stations and servers, multi-function work stations, LCD displays, LCD/PC combinations, SATCOM systems, mobile computer systems, and mobile tactical computing platforms. The parties agree that all such Inventions will be the sole and exclusive property of the Assignee, and that the parties intend for all right, title, and interest to the Inventions to be irrevocably assigned by Assignor to the Assignee according to this Agreement. The parties agree that Secutor, LLC shall be a third party beneficiary of this Agreement.

2.0 Assignor acknowledges and agrees that any copyrightable works prepared by Assignor within the scope of employment are "works for hire" under the Copyright Act and that the Assignee will be considered the author and owner of such copyrightable works.

3.0 Assignor hereby irrevocably grants, transfers, assigns, and conveys to or, if necessary, will grant, transfer, assign and convey to Assignee, and its successors and assigns, all right, title, interest, ownership, and all subsidiary rights, including all rights accrued or accruing to the Assignor under copyright laws, patent laws, trade secret laws, etc., in and to the Inventions throughout the world, in perpetuity and in any manner or media, whether now known or later invented as provided herein in any future employment with the Assignee. In addition to the foregoing assignment, Assignor hereby irrevocably grants, transfers, assigns, and conveys to the Assignee all right, title, and interest to all patents, patent applications, copyrights, mask works, trade secrets and other intellectual property rights in any Invention throughout the world.

4.0 If anything created, invented, or authored by Assignor that relates in any way whatsoever to the Assignee's Business is not subject to assignment or transfer to Assignee under this Agreement, then Assignee represents and warrants that such is listed in Appendix A.

5.0 Assignor agrees to assist the Assignee, or its designee, at the Assignee's expense, in every proper way to secure the Assignee's rights in the Inventions and to any copyrights, patents, mask work rights or other intellectual property rights relating thereto in any and all countries, including the disclosure to the Assignee of all pertinent information and data with respect thereto, the execution of all applications, specifications, oaths, assignments and all other instruments which the Assignee shall deem necessary in order to apply for and obtain such rights and in order to assign and convey to the Assignee, its successors, assigns, and nominees the sole and exclusive rights, title and interest in and to such Inventions, and any copyrights, patents, mask work rights or other intellectual property rights relating thereto. Assignor further agrees that his obligation to execute or cause to be executed, when it is in his power to do so, any such instrument or papers shall continue after the termination of his employment with the Assignee, whether with or without cause. Assignor hereby irrevocably designates and appoints the Assignee and its duly authorized officers and agents as his agent and attorney in fact to act for and in his behalf and stead to execute and file any application for any United States or foreign patents or copyright registrations covering Inventions assigned to the Assignee and to do all other lawfully permitted acts to further the prosecution and issuance of letters patent or copyright registrations thereon with the same legal force and effect as if executed by Assignor. Assignor agrees that its obligations under this section shall continue after the termination of employment with the Assignee, whether with or without cause.

6.0 Assignor represents and warrants that the Inventions are the Assignor's original creation or invention, that the Inventions were not copied or derived from any work owned by others, or violate any rights of others, including but not limited to copyright or patent.

7.0 Assignor understands that Assignee will act in reliance on this Agreement, and accordingly declares it to be irrevocable, and hereby releases and discharges Assignee, its affiliates, and their respective successors, assigns, and all persons, corporations or legal entities (or "Assignee and Affiliates") acting with his permission or upon his authority, from any and all claims whatsoever in connection with the use of the Inventions. Assignor agrees that Assignee and Affiliates will suffer irreparable harm for any unauthorized withholding of inventions or concepts or other violation of the provisions of this Agreement, which shall be deemed a material breach of this Agreement. The parties agree that upon any such breach, the Assignee and Affiliates shall be entitled to equitable relief without the need to prove irreparable harm or to post any bond. This right to equitable relief shall be in addition to any other appropriate remedies, including without limitation, reasonable attorney's fees incurred to enforce this Agreement.

8.0 This Agreement shall be governed by and construed in accordance with the domestic laws of the Commonwealth of Virginia without giving effect to any choice or conflict of law provision or rule (whether of the Commonwealth of Virginia or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the Commonwealth of Virginia. In the event of a dispute between the parties, the parties agree and consent to exclusive jurisdiction and venue for any federal court action in the United States District Court for the Eastern District of Virginia in Norfolk, Virginia, and exclusive jurisdiction and venue for any other court action in the Norfolk, Virginia District or Circuit Court. The parties hereby irrevocably waive any objection they may have to such jurisdiction and venue in such courts.

8.0 This Assignment constitutes the complete agreement between the parties with respect to the subject matter hereof, and supersedes any prior oral or written agreements with respect thereto.

9.0 Except for the Inventions assigned to Assignee and that listed in Exhibit A, Assignor represents and warrants that Assignor does not own or possess any inventions, original works of authorship, developments, improvements, or trade secrets that relate in any way to the Business, or any intellectual property therein. Assignor hereby covenants not to sue Assignee and Affiliates (including Secutor, LLC as a third party beneficiary), and their directors, officers, members, managers, partners, attorneys, insurers, employees, and agents with respect to any and all known or unknown claims, demands, and causes of action of any sort or damage, in equity or contract, arising under any inventions, original works of authorship, developments, improvements, or trade secrets, or any intellectual property therein, whether patent, copyright, etc., that relate in any way to the Business.
