CONFIRMATORY ASSIGNMENT

WHEREAS, I, Audeen Alan Richetto (hereinafter ASSIGNOR), have made certain new and useful inventions and improvements described in patents and applications for patents of the United States, as listed on Schedule A attached;

AND WHEREAS Resistance Temperature Detector Company, Inc., a corporation organized and existing under the laws of the State of Minnesota, having Registered Office Address of 440 N Emerson, Cambridge MN 55008 and a Principal Executive Office Address of 15825 Central Ave NE, Ham Lake MN 55304 (hereinafter ASSIGNEE), is desirous of acquiring the entire right, title and interest in and to said inventions, improvements, patents and applications and in and to the patents to be obtained therefor; in accordance with agreements duly entered into with me;

AND WHEREAS ASSIGNOR previously executed from time to time assignment documents with the intent of selling, assigning and transferring all my right, title and interest in certain of the patents and patent applications listed in Exhibit A to ASSIGNEE; however, these previously-executed assignment documents referred to ASSIGNEE by its trade name RTD Company; accordingly, I am executing this Confirmatory Assignment: (1) nunc pro tunc to confirm that the previously-executed assignment documents did assign my entire right, title and interest in the patents and patent applications identified in those assignment documents to ASSIGNEE, notwithstanding the reference to ASSIGNEE by its trade name RTD Company; and (2) further to assign to ASSIGNEE my entire right, title and interest in the other patents and applications listed on Exhibit A;

CONFIRMATORY ASSIGNMENT

NOW, THEREFORE, to all whom it may concern, be it known that for and in consideration of said agreements and of other good and valuable consideration, the receipt of which is hereby acknowledged, I have sold, assigned, and transferred, and by these presents do sell, assign and transfer unto said ASSIGNEE, its successors, assigns and legal representatives, my entire right, title and interest in and throughout the United States of America, its territories and all foreign countries, in and to the patents and applications listed on Exhibit A, said inventions as described in said patents and applications, together with my entire right, title and interest in and to such patents as may issue on any of the said applications, and any reissue, continuation, divisional and foreign counterparts thereof and including the right to claim priority under any applicable statute, treaty or convention based on said patents and applications; said inventions, applications and patents to be held and enjoyed by said ASSIGNEE for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which said patents may be granted as fully and entirely as the same would have been held by me had this assignment not been made; I hereby convey all rights arising under or pursuant to any and all international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for patents, all choses in action pertaining to the applications or patents including the right to sue for and collect damages and other recoveries for past infringement thereof, all rights to initiate proceedings before government and administrative bodies, and all files, records and other materials arising from the prosecution, exploitation, or defense of rights and registrations pertaining to the applications or patents. I hereby acknowledge that this assignment, being of my entire right, title and interest in and to said

AND, I hereby further agree for myself and my executors and administrators to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary to secure fully the aforesaid patents, applications and inventions to said ASSIGNEE, its successors, assigns and legal representatives, but at its or their expense and charges, including the execution of applications for patents in foreign countries, and the execution of substitution, reissue, divisional or continuation applications and preliminary or other statements, the giving of testimony in any interference or other proceeding in which said inventions or any application or patent directed thereto may be involved, and the communication to said ASSIGNEE, its successors, assigns and legal representatives, of all facts known to me relating to said inventions and the history thereof;
