- C. Assignor and Assignee each desires, by execution of this Assignment, to confirm the assignment of all of Assignor's rights, title, and interest in and to the Assigned Patents to Assignee.

### AGREEMENTS

For valuable consideration, including that set forth in the Asset Purchase Agreement, the receipt and sufficiency of which is hereby acknowledged, and in consideration of the covenants and agreements set forth herein, Assignor and Assignee mutually agree as follows:

1. Definition of Assigned Patents. The term "Assigned Patents" shall mean the patents listed in Appendix A attached hereto and made a part hereof, as well as: (a) all rights to claim priority in any Assigned Patents and all rights in and to any and all inventions which are disclosed in any Assigned Patents; (b) any and all patents maturing from a continuation, continuation-in-part, division, reissue or reexamination of any Assigned Patents and regardless of whether such patent matures from a convention or non-convention application, or any other substitution, renewal, extension, addition, utility model or other United States or foreign patent; (c) all renewals thereof; and (d) all rights of action, powers and benefits accrued thereto, including the right to sue for and/or initiate any proceeding to collect damages and payments for past or future infringements thereof.
2. Assignment of the Assigned Patents. Assignor hereby sells, assigns and transfers to Assignee, its successors and assigns all of Assignor's right and title to and interest in the Assigned Patents, including the right to claim priority in and to the same.
3. Further Assurances. (a) Assignor further agrees to take all reasonable and necessary steps to implement the provisions of the Assignment; (b) Assignor agrees to assist Assignee in the prosecution of any assigned patent applications upon Assignee's reasonable request; and (c) Assignor shall provide Assignee, its successors, and assigns, or their legal representatives, cooperation and assistance at Assignee's reasonable request (including the execution and delivery of affidavits, declarations, oaths, exhibits, assignments, or other

documentation) as may be reasonably required in the implementation of this Assignment. Assignor warrants that Assignor has the full and unencumbered right to sell, assign, and transfer the Assigned Patents. This Assignment of the Assigned Patents is granted free and clear of all security interests, liens, encumbrances, claims or interests of any kind or nature.

4. Incorporation of Representations, Covenants and Warranties. Notwithstanding anything in this Assignment to the contrary, the representations, covenants and warranties, including the limitations set forth therein, of Assignor contained in the Asset Purchase Agreement are incorporated herein by reference. This Assignment may be executed by facsimile delivery or other electronic means (*i.e.*, PDF) of original signatures and in counterparts, each of which shall be considered one and the same agreement, and shall become effective when such counterparts have been signed by each party and delivered to the other party.
