ASSIGNMENT

WE, Chad L. Robran and Douglas Parsell of 3650 Annapolis Lane, Suite 105, Plymouth, MN, 55447 and 327 Arlington Circle, Ridgeland, MS 39157, have invented a method and apparatus entitled DEVICE AND METHOD FOR PELVIC ELEVATION AND STABILIZATION OF SURGICAL PATIENT hereinafter called the "invention."

Preferred embodiments of said invention are disclosed in a United States patent application now identified as File No. 19757.1 of the law firm of Workman Nydegger, 1000 Eagle Gate Tower, 60 East South Temple, Salt Lake City, Utah 84111, and filed in the United States Patent and Trademark Office as Serial No. 13/736,742 on January 8, 2013.

Assignee, Bone Foam Inc., a corporation of the state of Minnesota and having a principal place of business at 3650 Annapolis Lane, Suite 105, Plymouth, MN 55447, desires to secure the entire right, title and interest in the invention.

The above-named inventors having executed an Assignment on December 15, 2012 to Assignee, but wherein the Assignee was mistakenly identified as Bone Foam LLC rather than Bone Foam Inc., said Assignment being recorded in the United States Patent and Trademark Office at Reel 029590 on Frame 0234, and in order to correct said Assignment, do execute this Assignment Nunc Pro Tunc as of the effective date set forth herein.

In consideration of One Dollar (\$1.00) and other good and valuable consideration paid to us by Assignee, the receipt and sufficiency of which we hereby acknowledge, WE HEREBY ASSIGN TO ASSIGNEE:

The entire right, title and interest in the inventions in the above-identified United States patent application, the above-identified United States patent application, and in all divisions, continuations and continuations-in-part of the application, or reissues or extensions of Letters Patent or Patents granted thereon, and in all corresponding applications filed in countries foreign to the United States, and in all patents issuing thereon in the United States and foreign countries.

The right to file foreign patent applications on the invention in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

All claims for damages and all of the remedies arising out of any infringement of the invention or the above-identified United States patent application which may have accrued prior to the date of this assignment or may accrue, including, but not limited to, the right to sue for and collect and retain damages for past infringements of the invention or the above-identified United States patent application.

We hereby authorize and request the United States Commissioner of Patents and Trademarks and such Patent Office officials in foreign countries as are duly authorized by their patent laws to issue patents to issue any and all patents on the inventions to Assignee as the owner of the entire interest, for the sole use of Assignee, its successors, assigns and legal representatives.

We hereby agree, without further consideration and without expense to us, to sign all lawful papers and to perform all other lawful acts which Assignee may request of us to make this Assignment fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, substitute, reissue and other United States and foreign patent applications on the inventions, and all lawful documents requested by Assignee to further the prosecution of any of such patent applications.

Cooperation to the best of our abilities in the execution of all lawful documents, the production of evidence, nullification, reissue, extension or infringement proceedings involving the invention.

This assignment and agreement shall be effective as of March 28, 2013. Further, this assignment and agreement shall be binding upon our respective heirs and legal representatives.
