**ASSIGNMENT NUNC PRO TUNC**

WHEREAS, Assignee, Wavetronix LLC, a limited liability company of the State of Idaho, having a principal place of business at 78 East 1700 South, Building B, Provo, UT 84606, is the owner of record of United States Patent No. 7,991,542 which issued on August 2, 2011 and filed in the United States Patent and Trademark Office as Serial No. 11/689,441 on March 21, 2007 ("the '542 patent");

WHEREAS, Assignee, Wavetronix LLC, is also the owner of record of United States provisional application Serial No. 60/785,964, filed on March 24, 2006 ("the '964 application");

WHEREAS, Assignors, Bradley C. Giles and Michael J. Miller, the inventors of the above-identified patent, executed an Assignment on April 2, 2007 regarding the '542 patent and executed an Assignment on April 6, 2006 regarding the '964 application, which mistakenly identified the assignee as Wavetronix LLC, a corporation of the State of Utah, rather than, a limited liability company of the State of Idaho, said Assignments being recorded in the United States Patent and Trademark Office at Reel 019141 on Frame 0971, and Reel 017633 on Frame 0026, respectively, and in order to correct said Assignments, Assignor executes this Assignment Nunc Pro Tunc as of the effective date set forth herein.

THEREFORE, in exchange for good and valuable consideration paid to Assignor by Assignee, the receipt and sufficiency of which we hereby acknowledge, ASSIGNORS HEREBY ASSIGN TO ASSIGNEE:

The entire right, title and interest in the invention in the above-identified United States patent applications, the above-identified United States patent applications, and in all applications claiming the benefit thereof or priority thereto, the '542 patent, and in all divisions, continuations and continuations-in-part of the applications, or reissues or extensions of Letters Patent or Patents granted thereon, and in all corresponding applications which may be filed in countries foreign to the United States, and in all patents issuing thereon in the United States and foreign countries.

The right to file foreign patent applications on said invention in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

All claims for damages and all of the remedies arising out of any infringement of the invention or the above-identified United States patent applications which may have accrued prior to the date of this assignment or may accrue, including, but not limited to, the right to sue for and collect and retain damages for past infringements of the invention or the above-identified United States patent applications.

Assignor hereby authorizes and requests the United States Commissioner of Patents and Trademarks and such Patent Office officials in foreign countries as are duly authorized by their patent laws to issue patents to issue any and all patents on said invention to the Assignee as the owner of the entire interest, for the sole use of Assignee, its successors, assigns and legal representatives.

Assignor hereby agrees, without further consideration and without expense, to sign all lawful papers and to perform all other lawful acts which Assignee may request of Assignor to make this Assignment fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, substitute, reissue and other United States and foreign patent applications on the invention, and all lawful documents requested by Assignee to further the prosecution of any of such patent applications.

Cooperation to the best of Assignor's ability in the execution of all lawful documents, the production of evidence, nullification, reissue, extension or infringement proceedings involving the invention.

This assignment and agreement shall be effective regarding the '964 application as of April 6, 2006 and regarding the '542 patent as of April 2, 2007.
