PATENT RIGHTS ASSIGNMENT

This Patent Rights Assignment (this "Assignment") is made effective this 30th day of May, 2013, by and between Source Technologies, LLC, a limited liability company organized and existing under the laws of Delaware, and having a usual place of business at 2910 Whitehall Park Drive, Charlotte, North Carolina 28273 ("Assignor") and Datamax-O'Neil Corporation, a corporation organized and existing under the laws of Delaware, and having a usual place of business at 4501 Parkway Commerce Blvd., Orlando, Florida 32808 ("Assignee").

WHEREAS, Assignor possesses certain rights in and to the patents and patent applications (and patents issuing on such applications) set forth on Exhibit A attached hereto and incorporated herein by reference (collectively, the "Patent Rights"); and

WHEREAS, Assignor and Assignee are parties to that certain Asset Purchase Agreement, dated as of the date hereof (the "Purchase Agreement"), pursuant to which Assignor transferred, sold and conveyed to Assignee certain assets of Assignor, including the Patent Rights; and

WHEREAS, Assignor now wishes to assign the Patent Rights to Assignee, and Assignee desires to acquire the Patent Rights from Assignor.

NOW, THEREFORE, in consideration of the promises set forth above and in the Purchase Agreement and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged:

Assignor does hereby sell, assign, convey and transfer unto Assignee and its successors, assigns, and legal representatives, Assignor's entire right, title and interest in and throughout the world in and to the Patent Rights, all improvements on such patents and such other patents as may issue thereon or claim priority under United States law or international convention, including, but not limited to, non-provisionals, continuations, divisionals, reissues, reexaminations, extensions, renewals and substitutions of patents and patent applications within the Patent Rights or such other patents, and any right, title and interest Assignor may have in applications to which the Patent Rights claim priority; the Patent Rights to be held and enjoyed by Assignee for its own use and on behalf and for its successors, assigns and legal representatives, to the full end of the term for which said patents may be granted as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made; and Assignor hereby conveys all of its rights arising under or pursuant to any and all United States laws and international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for patent, including but not limited to any cause(s) of action and damages accruing prior to this assignment. Assignor hereby acknowledges that this assignment, being of Assignor's entire right, title and interest in and to the Patent Rights carries with it the right in Assignee to apply for and obtain from competent authorities in all countries of the world any and all patents by attorneys and agents of Assignee's selection and the right to procure the grant of all patents to Assignee in its own name as assignee of Assignor's entire right, title and interest therein.

Assignor hereby further agrees for itself and its successors, assigns, agents, employees and legal representatives to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary to secure fully the Patent Rights to Assignee, its successors, assigns, and legal representatives, as well as to third parties at the request of Assignee, including the execution of documents (including, without limitation, petitions, specifications, oaths, assignments,

disclaimers, declarations and affidavits) relating to non-provisional, substitution, continuation, divisional, reissue, renewal, reexamination, or corresponding foreign or international patent applications within the Patent Rights, as requested by Assignee, and generally assist, cooperate and do everything reasonably possible to aid Assignee, its successors, assigns and legal representatives to obtain, record, maintain, and enforce full protection for the Patent Rights in all countries, but in each instance at Assignee's expense.

Assignor hereby further agrees to provide documentary evidence and statements or testimony in any interference, opposition, re-examination, reissue or other proceeding in which any of the Patent Rights may be involved, in each instance at Assignee's expense.

Assignor does hereby authorize the Director of the United States Patent & Trademark Office, and the empowered officials of all other governments whose duty it is to record patents, applications and title thereto, to record the Patent Rights and title thereto as the property of Assignee, its successors, assigns, or legal representatives in accordance with the terms of this instrument.

Assignor does hereby further authorize and request the Director of the United States Patent and Trademark Office and the empowered officials of all other governments to issue such Patent Rights or patents as shall be granted upon the Patent Rights, or applications based thereon, to Assignee, its successors, assigns, or legal representatives.

Assignee and Assignor covenant and agree that the representations, warranties, covenants and agreements of the parties contained in the Purchase Agreement shall not merge into or with this Assignment, but shall survive this Assignment and shall continue in full force and effect for the period specified in the Purchase Agreement as though set forth herein at length.

Assignee and Assignor also agree that multiple copies of this Assignment may be executed, each of which shall be deemed an original and all of which together shall constitute one and the same agreement, and each of which shall be valid and binding upon Assignee and Assignor.
