ASSIGNMENT

WHEREAS I, **PAUL LAMBERT**, residing in El Dorado Hills, California, have invented certain new and useful improvements in

DEVICES AND METHODS FOR PROTECTING A USER FROM A SHARP TIP OF A MEDICAL NEEDLE

which are described in United States Patent Application Serial No. 12/187,256 filed on August 6, 2008, and in the provisional patent application (U. S. Patent Application Serial No.61/130,880) from which the above application claims priority (collectively, the "applications");

WHEREAS, **EMED TECHNOLOGIES**, a corporation doing business at El Dorado Hills, California, is desirous of acquiring the entire interest in the underlying invention described in the applications, and in any and all Patents of the United States and of any other countries in which application for patent has been or will be made, that may be obtained therefor;

NOW, THEREFORE, be it known that for and in consideration I hereby acknowledge, I have sold, assigned and transferred, and by these presents do sell, assign and transfer unto **EMED TECHNOLOGIES**, its legal representatives, successors and assigns, the full and exclusive rights, worldwide, to the said invention as set forth and described in the above-mentioned applications, and to any applications filed on the invention, including the applications and any and all divisions and continuations thereof, and any and all Letters Patents or Grants provided in the United States and in any other country, worldwide, which may be granted therefor, and any and all reissues of said Letters Patents and Grants, the same to be held and enjoyed by **EMED TECHNOLOGIES**, its legal representatives, successors and assigns, to the full end of the term for which said Letters Patent and Grants may be granted or may be reissued or extended, as fully and entirely as the same would have been held by me, had this assignment and sale not been made.

AND I hereby authorize **EMED TECHNOLOGIES** to make application for Letters Patent(s) and the Director to issue any and all Letters Patent(s) of the United States on the invention or resulting from the applications and from any and all divisions and continuations thereof to **EMED TECHNOLOGIES** as the assignee of the entire right, title and interest in and to the same.
