Where these instructions and information form an independent, separately patentable invention or are at least creative supplements that significantly change the subject matter of the aforementioned disclosed invention, you shall be obliged pursuant to Section 5 ArbEG to notify us of this in a further formal invention disclosure. This obligation on your part shall form an independent and specific part of this agreement.

If no intellectual property rights application is made, we shall be free, by means of a disclosure of the invention, to make it part of the prior art (defensive disclosure). In the event of a defensive disclosure, you shall agree to be named as the originator of the idea.

The option of declaring the invention a trade secret pursuant to Section 17 ArbEG, shall be unaffected by this agreement.

If there is no intellectual property rights application or declaration as a trade secret, the incentive bonus shall cover all claims resulting from and in connection with the invention; this shall also include any remuneration claims in the unexpected case of a use of the invention. The bonus shall also cover any adjustment claim (Section 12, para. 6 ArbEG) due to a change to a prediction relating to the use, the economic value of the invention and the assurance of intellectual property rights, which is naturally not reliable at present. The same shall apply to any right to access to information and financial accounts.

If the invention is registered as an intellectual property right or if it is declared a trade secret, our obligation under the ArbEG to pay an appropriate level of inventor's remuneration in the event of use or (if an intellectual property right is granted) in the event of storage for future use (Sections 9, 12 ArbEG) shall remain. **The incentive bonus shall not be offset against the inventor's remuneration.** With respect to such claims for inventor's remuneration, you shall agree that your right to access to information and financial accounts shall be limited to disclosure of the total product-related sales with products according to the invention and the share of the product according to the invention (relevance/benchmark figure). Where available on existing computer lists, if requested, we shall also notify the number of products according to the invention. The incentive bonus also takes this waiver of a right into account.

In this agreement, you also confirm with your signature as (co-)inventor that your contribution to the invention as a result of your own individual intellectual work is as shown against your name in the introduction.³

In the event of individual provisions of this agreement being or becoming invalid, the validity of the other provisions shall not be affected thereby. The parties shall undertake to replace ineffective provisions by new provisions that meet the requirements of the regulations in the invalid provisions in a legally permissible way.
