ASSIGNMENT OF RIGHTS: PATENT APPLICATION

Sridhar Donepudi ("Assignor") is owner of "Dynamic Multi-Access Wireless Network Virtualization" as described in the U.S. Patent Application No. 14/034915 filed on September 24, 2013 and filed with an accompanying Oath signed by Assignor (the "Patent Application"). Parallel Wireless, Inc. ("Assignee") desires to acquire all rights in and to the Patent Application and the patent (and any reissues or extensions) that may be granted.

Therefore, for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor assigns to Assignee 100% of his right, title, and interest in the invention and Patent Application, as well as such rights in any patent applications to which the Patent Application claims priority, divisionals, continuations, continuations-in-part, substitute applications, or any foreign counterpart patents that may issue claiming priority to the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Patent Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.
