## INVENTION ASSIGNMENT

Ralph Enderle ("Assignor"), an individual residing in Nuremberg, Germany, is an inventor of the invention entitled "Proppant Material Incorporating Fly Ash and Method of Manufacture" (the "Invention") as described in the U.S. Patent Application having the same title which has been filed on behalf of Assignor in the United States Patent and Trademark Office on 20 August 2013, as U.S. Patent Application Serial Number 13/971,287 (the "Patent Application").

Epropp, LLC ("Assignee"), a New York business entity whose mailing address is Wormser, Kiely, Galef & Jacobs LLP, 825 Third Avenue, New York, New York 10022, desires to acquire all rights in and to the Patent Application and the patent (and any reissues or extensions) that may be granted.

Now, therefore, for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor assigns to Assignee his entire right, title, and interest in and to the Invention and the Patent Application (as well as such rights in any divisions, continuations, continuations-in-part thereof and substitute applications therefore) for the entire term of the issued Patent and any reissues or extensions thereof which may be granted and for the entire terms of any and all foreign patents which may issue from foreign applications (as well as divisions, continuations, continuations-in-part thereof and substitute applications therefore) filed claiming priority under the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any patents resulting from the Patent Application to Assignee according to Assignment. The right, title, and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this Assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Patent Application (including without limitation divisions, continuations, continuations-in-part thereof and substitute applications therefore) and any foreign counterparts; (b) execute, verify, acknowledge and deliver all such further lawful papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain patents for the Invention in any and all countries.
