## INTELLECTUAL PROPERTY RIGHTS ASSIGNMENT AGREEMENT

This Intellectual Property Rights Assignment Agreement (this "Agreement") is entered into as of June \_\_, 2011 by Geyser Pump Tech, LLC, a Delaware limited liability company ("Assignee"), Geyser Pump Tech Co., an Ohio corporation ("Geyser Tech Co."), Masao Kondo ("Kondo") and Fadi Kassir, an individual ("Kassir"). Geyser Tech Co., Kondo and Kassir are each individually referred to herein as an "Assignor" and are collectively referred to herein as the "Assignors."

### INTRODUCTION

WHEREAS, each Assignor has entered into a Contribution Agreement with Assignee whereby the Assignor has agreed to assign to Assignee all of its right, title and interest in and to those letters patents, provisional patents, patent applications and inventions identified on Schedule A attached to this Agreement and made a part hereof, and the underlying subject matter thereof, and related Intellectual Property (as defined below) rights, and all other Intellectual Property rights relating to the present and/or proposed business of Geyser Tech Co. (collectively, the "Assigned Intellectual Property"), in consideration of the issuance to the Assignor of a certain number of common units of ownership in Assignee (the "Consideration").

NOW, THEREFORE, for the Consideration and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be fully and legally bound, Assignors and Assignee acknowledge and agree as follows:

**1. Assignment.** Assignors, collectively and individually, agree to assign and transfer, and hereby assign and transfer, to Assignee, irrevocably and unconditionally, to the fullest extent permitted by applicable law under any interpretation of the relationship among the parties, Assignors' and each of Assignor's entire right, title and interest (including without limitation all Intellectual Property rights) embodied in or associated with the Assigned Intellectual Property, including without limitation all claims, if any, which may have arisen for infringement of the Assigned Intellectual Property prior to the date of this Agreement; all said rights to be held and enjoyed by Assignee for its own use and for the use of its successors, assigns or other legal representatives as fully and entirely as the same would have been held and enjoyed by Assignors if this Agreement had not been made.

**2. Further Actions in Support of Assignment.** Promptly upon request by Assignee and at Assignee's expense, each Assignor shall execute and deliver to Assignee all applications, assignments, agreements and other instruments and take such reasonable actions as Assignee may deem helpful to fully vest the foregoing rights in Assignee or to evidence such vesting. If Assignee is unable, after reasonable effort, to secure an Assignor's signature on any such document or instrument or receive an Assignor's requested action, such Assignor hereby irrevocably designates and appoints Assignee and its duly authorized representatives as the an Assignor's agents and attorneys-in-fact to execute and file any such document or instrument and to do all other lawfully permitted acts to further the prosecution and issuance of letters patent, copyright registration and other forms of intellectual property protection, and otherwise to

accomplish the purposes described in the preceding sentence, with the same legal force and effect as if executed or done by the Assignor.

**3. Definitions.** For the limited purposes of this Agreement, the following terms shall have the following meanings:

(a) "Intellectual Property" means all rights of every nature relating to intellectual property, including without limitation (i) all United States and foreign patents and patent applications now or hereafter filed (including, as example rather than limitation, all continuations, continuations-in-part, divisionals, reissues, extensions, reexaminations and foreign counterparts thereof), and all rights with respect thereto, including all claims, if any, which may heretofore have arisen for infringement of the Assigned Intellectual Property, (ii) all Trade Secrets, and (iii) all copyrights and renewals thereof and other rights relating to literary or artistic works, computer software, or data compilations (including without limitation author's and moral rights and rights of publicity and privacy).

(b) "Trade Secrets" means all trade secrets under the laws of any jurisdiction, including but not limited to: ideas, inventions, discoveries, developments, designs, improvements, formulae, laboratory materials, prototypes, know-how, methods, processes, techniques, product specification and performance data, computer programs, and other data, in each case whether or not patentable, copyrightable or within any particular definition of trade secret, and other unpublished proprietary information relating to Assignee's Intellectual Property.

**4. Miscellaneous.**

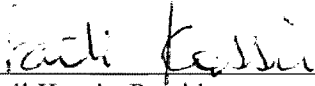

(a) If any provision of this Agreement is invalid, illegal or unenforceable in any respect, the validity, legality and enforceability in every other respect of such provision and of the remaining provisions shall not in any way be affected or impaired thereby. If a court determines that any provision herein is invalid, illegal or unenforceable, for any reason, such provision shall be deemed amended to the extent necessary to comply with such determination, and such provision, as so amended, shall be valid and binding as though the invalid, illegal or unenforceable portion had not been included herein.

(c) This Agreement shall be binding upon and shall inure to the benefit of the parties, their successors, assigns and legal representatives, may be amended only in writing, and shall be governed by and construed in accordance with the laws of the Commonwealth of Massachusetts without regard to principles of conflicts of law. It may be executed in counterparts.

IN WITNESS WHEREOF, Assignors and Assignee hereby execute this Agreement as of the date set forth above.
