## ASSIGNMENT

The undersigned (hereinafter "Assignor") of the residence(s) indicated below are the inventor(s) of certain invention(s) and embodiment(s) thereof (hereinafter collectively the "Inventions") described in the following applications:

United States Patent Application Serial Number 13/301,193, filed on November 21, 2011 titled Open Source License Management; and

United States patent Application Serial Number 14/032,626, filed on September 20, 2013 titled Open Source License Agreement (hereinafter the "Applications").

Frost Brown Todd, a Limited Liability Company having a principal place of business at 3300 Great American Tower, 301 East Fourth Street, Cincinnati, OH 45202, and its successors, assigns, and legal representatives (hereinafter collectively "Assignee") desires, to the extent it has not already done so, to secure the entire right, title and interest in and to the Inventions.

For good and valuable consideration, the receipt and adequacy of which is acknowledged, Assignor, to the extent Assignor has not already done so, hereby:

1. Sells, assigns and transfers to Assignee the entire right, title and interest in and to the Inventions, the Applications, any other applications to which the Applications claim priority benefit, including but not limited to related provisional applications, any other patent applications based in whole or in part upon the Inventions or Applications in any country (including Patent Cooperation Treaty, divisional, renewal, substitute, continuation, and continuation-in-part applications), all patents and other forms of intellectual property protection which may be granted thereon (including all reissues, reexaminations, and extensions thereof) and all priority rights appertaining thereto;

2. Sells, assigns and transfers to Assignee the entire right to claim the benefit of priority to the Applications;

3. Sells, assigns and transfers to Assignee all right, title and interest, throughout the world, including any copyrights and renewals or extensions thereto, in the Inventions, Applications, and any related work product, including, but not limited to, the web based open source portal whose interfaces were used to create diagrams for the Applications;

4. Authorizes Assignee to file applications for patents and other forms of intellectual property protection on the Inventions in any country in the name of Assignee or otherwise as Assignee may deem advisable;

5. Authorizes and requests the Director of the United States Patent & Trademark Office, and such patent office officials in foreign countries as are duly authorized by their laws to issue patents, to issue any patents on the Inventions to Assignee as the owner of the entire right, title, and interest therein or otherwise as Assignee may direct;
