(B) The International and Argentine patent applications that are identified in Part 2 of the Schedule ("the Completion Applications") claim priority from the Singapore and United States patent applications that are identified in Part 1 of the Schedule ("the Priority Applications").

(C) The Inventors were at all material times employed by the University to carry out the research from which the Invention arose.

(D) The Inventors have agreed to execute this Assignment in order to confirm that, as between them and the University and by virtue of their employment by the University, the University was the first owner of their contributions to the Invention.

(F) Under clause 8.2 of the RRDA, all inventions and patent rights invented or created in the course of the said research and development programme on or after 1 January 2007 are owned solely and exclusively by the Assignee.

(G) In pursuance of the RRDA, the University and the Assignee have agreed to execute this Assignment in order to confirm and ensure that the Invention belongs to the Assignee.

(H) The Completion Applications were filed in the name of the Inventors and Yin Sze LOH and the Assignee (with the exception of the designation of the United States of America in the International patent application, which was filed in the names of all of the inventors, as required by US law).

(I) The Inventors and the University have agreed to execute this Assignment to the Assignee of all their respective rights title and interest in, to, under and arising from the Priority Applications and the Completion Applications for all designated states including (without limitation) Canada and the United States of America.
