OP \$40.00 7328833

INVENTION ASSIGNMENT

This INVENTION ASSIGNMENT (this "Assignment") is made and effective as of the last of the respective dates shown in the signature block hereto (the "Effective Date") by the Assignor (as described below) in favor of INNOVATIVE DESIGN CONCEPTS INC., a corporation duly organized under the laws of the state of Arkansas, and having its principal place of business at 1507 Linker Mt. Road, Dover, AR 72837 ("Assignee").

WHEREAS, I, TEDDY E. WILEY, an individual residing at 1507 Linker Mt. Road, Dover, AR 72837 (the "Assignor") have invented confidential and proprietary technology that comprises a new and useful process, machine, manufacture, or composition of matter, or a new and useful improvement therefor, in certain matters described broadly as US 7,328,833
Foldable, knockdown Pallet Container (the "Inventions"), including specifically the technology depicted on attached Exhibit A;

WHEREAS Assignor has formed a business entity, Innovative Design Concepts Inc., the said Assignee herein, to own and commercially develop the Inventions; and

WHEREAS, Assignor desires to bestow upon Assignee all right, title, and interest in, to, and under said Inventions, any Patent Applications and any and all patents (foreign or domestic) that may issue therefrom, including (without limitation), all continuations, continuations in part, divisionals, renewals, extensions, and the like and Assignee desires to acquire said 100% interest in the said Inventions.

NOW, THEREFORE, to all whom it may concern, be it known that for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor, by this Assignment and these presents, does hereby assign and transfer and hereby confirms such assignment and transfer unto said Assignee the full and exclusive right, title and interest, throughout the world:

In, to and under said Inventions as disclosed herein;

In, to and under all filings, refilings, divisions, continuations and continuations-in-part of any Patent Applications in the United States of America;

In, to and under any and all Letters Patent of the United States of America which may issue from refilings, divisions, continuations and/or continuations-in-part thereof;

In, to and under any and all reissues and reviews of said Letters Patent of the United States of America;

In, to and under any and all applications for Letters Patent upon said Invention which may hereafter be filed in any and all countries foreign to the United States of America;

In, to and under any and all refilings, divisions, continuations and/or continuations-in-part of said foreign-filed applications;

In, to and under any and all Letters Patent of countries foreign to the United States of America, which may issue from the said foreign-filed applications, refilings, divisions, continuations and/or continuations-in-part; and

In, to and under any and all extensions of, and additions to, said Letters Patent of countries foreign to the United States of America,

the same to be held and enjoyed by said Assignee for its own use and behoof, and for its successors, legal representatives, and assigns, to the full end of the terms for which said Letters Patent may be granted, and we do hereby authorize and request the Commissioner of Patents and Trademarks to issue the said Letters Patent of the United States of America in accordance with this assignment.

1. **RIGHTS INCLUDED.** The transfer and assignment, as described above, shall also include the right to sue for past infringements of the Inventions disclosed herein, and any Letters Patent that may issue therefrom (whether known or unknown), and to hold for Assignee's own use all recoveries had in such suits, without need for accounting to Assignor. In any such litigation, Assignor shall provide reasonable cooperation, at Assignee's expense.
2. **REPRESENTATIONS.** Assignor represents and warrants that Assignor has the sole and exclusive ownership interest in and title to the Inventions (other than as may exist pursuant to a co-inventorship); that Assignor has not granted to any third party any rights that would conflict, in any material way, with the rights granted herein to Assignee; that, to the knowledge of Assignor, the Inventions are not being infringed by any third party; and that Assignor has the full right, power, and authority to make the herein assignment.

3. **COMMUNICATIONS.** Assignor hereby authorizes Assignee, with respect to the Inventions and any Patent Applications and Letters Patents that may issue therefrom, to communicate with the United States Patent & Trademark Office with the same effect as though such communications were made by or with Assignor directly.
4. **FURTHER ASSURANCES.** Assignor agrees to execute and deliver to Assignee and to perform such tasks as Assignee may reasonably require in order to vest in Assignee full and complete record title to the Inventions disclosed herein and any Letters Patent that may issue therefrom. For this limited purpose, Assignor hereby appoints Assignee as its attorney in fact to execute and deliver to Assignee, on behalf of Assignor, any and all such documents or instruments. This appointment shall be deemed to be a power coupled with an interest and shall be irrevocable.
5. **ANTI-ASSIGNMENT.** Assignee will not sell, assign or otherwise convey its interest in the Inventions to any other person, entity or corporation without the consent of Assignor being first obtained. If consent is given, this provision shall continue to apply to subsequent transfers.
6. **GOVERNING LAW.** This Assignment shall be governed exclusively pursuant to the laws of the State of Arkansas.

IN WITNESS WHEREOF, Assignor and Assignee have executed this Assignment as of the respective dates shown below.

(57) **ABSTRACT**

A heavy-duty pallet box for bulk goods and palletized loads. The knockdown box may be folded for storage. To erect it, a flat board comprising a pair of complementary, die-cut blanks, or a unitary blank comprising complementary halves, is unfolded. A central side panel and a pair of adjacent, foldable side panels on each blank are separated by score lines for folding. Suitable flaps project from each blank for gluing them together. A lower, generally trapezoidal segment is formed at each blank bottom, below the central panel. The latter segments, one from each of two blanks, are coupled to form the knockdown bottom of the desired foldable container. Smaller trapezoidal flanges project downwardly from each blank at opposite sides of the larger trapezoidal segment. These flanges include suitable glue tabs. When assembled, the flanges form a shelf that braces the container bottom, reinforcing the structure.
