Title of Invention: See attached Appendix

App. No.: See attached Appendix

Filing Date: See attached Appendix

Patent No.: See attached Appendix

Issue Date: See attached Appendix

Inventor(s): See attached Appendix

1. Palm, Inc. ("Assignee") is the owner of the entire right, title, and interest in and to the above-captioned application by virtue of a chain of title from the inventors to Palm, Inc. (full chain of title listed on the attached Appendix).

2. Assignee Palm, Inc. ("Palm") hereby grants written consent to correct the original Assignment from the inventors to Palm, Inc. to show Palm as a corporation of the state of Delaware rather than the currently indicated (and incorrect) state of California.

3. The error in listing the state of incorporation for Palm, Inc. as California was a typographical error, and was made without deceptive intent.

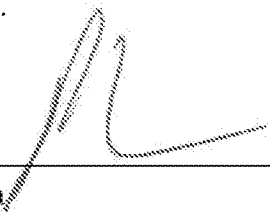

4. Locating all original inventors and obtaining additional signatures on a corrected assignment is not reasonably feasible and an attempt to do so would likely create an undue burden on Assignee. In accordance with the provisions of MPEP 323.01(b), Assignee submits that in view of the original assignors not being available to correct an original document or execute a new one, Assignee is entitled to submit an affidavit or declaration in which the Assignee identifies the error and requests correction. The error is stated herein and a corrected copy of the original Assignment document along with original recordation documents are submitted herewith.

5. The undersigned is a duly authorized officer of Palm, Inc. and is empowered to act on behalf of Palm, Inc. in this matter, as indicated below.

6. The statements I have made above are, to the best of my knowledge, true and complete. I make these statements under the pain and penalty of perjury.

(57) **ABSTRACT**

A method and system for using a wireless enabled portable computer system as a wireless modem. The portable computer system may be a personal digital assistant (PDA) having an internal wireless modem. The internal wireless modem, e.g., GSM radio, contains a communication port (port2) that communicates with a processor of the portable computer system. The portable computer system also contains another communication port (port1) that is externally available for connection to a second computer system. A software bridge is provided that copies commands and/or data from the port1 over to the port2 and vice-versa. The software bridge allows the second computer system to directly use the internal wireless modem of the portable computer system when the portable computer system is connected to the second computer. The connection to the second computer system can be made by a wired connection (e.g., serial interface, RS232) or by a wireless connection, e.g., Bluetooth or infra-red communication. The port1 and the port2 can be serial communication ports which may be UART compliant. The PDA thus extends wireless functionality to a second computer system (e.g., a notebook) using conventional connection mechanisms for communicating with the second computer system.

The diagram illustrates a system architecture for a PDA 100d connected to a PC 56. The PDA 100d contains an internal modem 240, a processor 101, a switch bridge 400, and two transmitters (XLTR) 392 and 394. The PC 56 includes a serial port 320 and a switch 325. The connection 108a is labeled RS232 265. A dashed oval 550 encloses the IR and BT components.
