(Device and Method for Conversion of Biomass to Biofuel)

WHEREAS, I, ARTHUR SHULENBERGER, residing in Millbrae, California, and I, MARK WECHSLER, residing in San Mateo, California (hereinafter referred to as the "Inventors"), each a citizen of the United States of America, have invented one or more inventions (hereinafter referred to as "said Invention(s)") disclosed in U.S. Patent Application No.: 13/042,356, entitled **DEVICE AND METHOD FOR CONVERSION OF BIOMASS TO BIOFUEL**, filed with the U.S. Patent and Trademark Office on March 7, 2011 (hereinafter referred to as "said Application"); and

WHEREAS, we, the Inventors, desire to assign to RENEWABLE FUEL TECHNOLOGIES, LLC, a California limited liability company, its successors and assigns (hereinafter collectively "the Assignee"), having its principle place of business at 181 42nd Avenue, San Mateo, California 94403, all right, title and interest in, to and under said Inventions(s) and said Application; and

WHEREAS, the Assignee desires to obtain all right, title and interest in, to and under said Inventions(s) and said Application; and

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which we, the Inventors, hereby acknowledge, we have sold, assigned, transferred and set over, and by this instrument hereby sell, assign, transfer and set over to the Assignee all right, title and interest in, to and under said Inventions(s) and said Application, including the right to apply for any Letters Patent of the United States of America and in any and all foreign countries on said Invention(s), and any and all other applications for Letters Patent on said Invention(s), in whatsoever countries, including all divisional, renewal, substitute, continuation, continuation-in-part and convention applications based in whole or in part upon said Invention(s) or upon said Application, and any and all Letters Patent which may issue thereon in the United States and foreign countries, and any and all reissues, extensions, renewals, divisions continuations or continuations-in-part of Letters Patent granted for said Invention(s) or upon said applications, to the full term or terms for which said Letters Patent may be issued, and every priority right that is or may be predicated upon or arise from said Invention(s), said Application and said Letters Patent, the same to be held and enjoyed by the Assignee for its own use and benefit fully and entirely as if the same would have been held and enjoyed by us, the Inventors, had this Assignment not been made. We, the Inventors, hereby authorize the Assignee to file patent applications in any and all countries on any or all of said Invention(s) in our name, or in its name, or otherwise as the Assignee may deem advisable, under the International Convention or otherwise.

We, the Inventors, hereby agree that we will, when requested without charge to said Assignee but at its expense, sign all papers, take all rightful oaths, and do all acts which may be necessary, desirable or convenient for securing and maintaining patents for said Invention(s) in any and all countries and for vesting title thereto in said Assignee, its successors, assigns and legal representatives or nominees.

We, the Inventors, hereby covenant and agree that we will, upon request of the Assignee, communicate to the Assignee any facts known to us, relating to said Invention(s) and the history thereof, testify in any legal proceeding, execute all lawful papers, including without limitation all divisional, continuing and reissue applications and all rightful oaths and declarations, and generally do all further acts which may be deemed necessary by the Assignee to obtain and enforce proper patent protection for said Invention(s) in all countries.

We, the Inventors, hereby authorize and empower the said Assignee, its successors, assigns and legal representatives or nominees, to invoke and claim for any application for patent or other form of protection for said Invention(s) filed by it or them, the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and to invoke and claim such right of priority without further written or oral authorization from us.

We, the Inventors, hereby consent that a copy of this Assignment shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document which may be required in any country for any purpose and more particularly in proof of the right of the said Assignee or nominee to claim the aforesaid benefit of the right of priority provided by the International Convention which may henceforth be substituted for it.
