**DECLARATION (37 C.F.R. 1.63) FOR UTILITY AND DESIGN PATENT  
APPLICATION USING AN APPLICATION DATA SHEET (37 C.F.R. 1.76) AND  
ASSIGNMENT**

Title of Invention: FINGERLOOP TOTE HANDLE, CONTAINER ASSEMBLY AND  
RELATED METHODS

As a below named inventor, I hereby declare that:

This declaration is directed to the attached application, or (if following box is checked):

☐ United States application or PCT international application number 14/199,699 filed  
on March 6, 2014.

The above-identified application was made or authorized to be made by me.

I believe that I am the original inventor or an original joint inventor of a claimed invention in the  
application.

I have reviewed and understand the contents of the application, including the claims.

I am aware of the duty to disclose to the United States Patent and Trademark Office all  
information known to me to be material to patentability as defined in 37 CFR Section 1.56.

Whereas, the undersigned inventor(s) has/have made certain inventions, improvements, and  
discoveries (herein referred to as the "invention") disclosed in the above-identified patent  
application;

Whereas, Fisher Scientific Company L.L.C., a corporation of Delaware, having a place of  
business at One Reagent Lane, Fair Lawn, New Jersey 07410 (herein referred to as "FISHER  
SCIENTIFIC"), desires to acquire, and each undersigned inventor desires to grant to FISHER  
SCIENTIFIC, the entire worldwide right, title, and interest in and to the invention and in and to  
any and all patent applications and patents directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being  
hereby acknowledged, each undersigned inventor ("ASSIGNOR") hereby sells or has sold,  
assigns or has assigned, and otherwise transfers or has transferred to FISHER SCIENTIFIC  
(the "ASSIGNEE"), its successors, legal representatives, and assigns, the entire worldwide  
right, title, and interest in and to the invention, the above-identified United States patent  
application, and any and all other patent applications and patents for the invention which may  
be applied for or granted therefor in the United States and in all foreign countries and  
jurisdictions, including all divisions, continuations, reissues, reexaminations, renewals,  
extensions, counterparts, substitutes, and extensions thereof, and all rights of priority resulting  
from the filing of such applications and granting of such patents. In addition, each undersigned  
inventor hereby authorizes and requests the Director of the United States Patent and  
Trademark Office to issue any United States Patent, and foreign patent authorities to issue any  
foreign patent, granted for the invention, to FISHER SCIENTIFIC, its successors, legal  
representatives, and assigns, the entire worldwide right, title, and interest in and to the same to  
be held and enjoyed by FISHER SCIENTIFIC, its successors, legal representatives, and  
assigns to the full end of the terms for which any and all such patents may be granted, as fully

and entirely as would have been held and enjoyed by the undersigned had this Assignment not been made; and each undersigned inventor agrees to execute any and all documents and instruments and perform all lawful acts reasonably related to recording this Assignment or perfecting title to the Invention and all related patents and applications, in FISHER SCIENTIFIC, its successors, legal representatives, and assigns, whenever requested by FISHER SCIENTIFIC, its successors, legal representatives, or assigns.

Each undersigned inventor acknowledges their prior and ongoing obligations to sell, assign, and transfer the rights under this Assignment to FISHER SCIENTIFIC and is unaware of any reason why they may not have the full and unencumbered right to sell, assign, and transfer the rights hereby sold, assigned, and transferred, and has not executed, and will not execute, any document or instrument in conflict herewith. Each undersigned inventor also hereby grants FISHER SCIENTIFIC, its successors, legal representatives, and assigns, the right to insert in this Assignment any further identification (including, but not limited to, patent Application Number) which may be necessary or desirable for recordation of this Assignment. This Assignment is governed by the substantive laws of the State of Delaware, and any disputes will be resolved in a Delaware state court or federal court sited in Delaware.

I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.
