PATENT ASSIGNMENT AGREEMENT

WHEREAS, Biocompatibles, Inc, a Delaware corporation located at 115 Hurley Road, Building 3, Oxford, Connecticut, USA ("Biocompatibles") and Eckert & Ziegler BEBIGs.a., a Belgian corporation located at Zone Industrielle C, 7180 Seneffe - Belgium ("Assignee"), are parties to the Asset Purchase Agreement dated September 17, 2013 (the "Purchase Agreement");

WHEREAS, pursuant to the Purchase Agreement, Biocompatibles has agreed to enter, and has agreed to cause Biocompatibles UK Ltd, a company registered in England and Wales with company number 4305025 with its registered address at Chapman House, Farnham Business Park, Weydon Lane, Farnham, Surrey GU9 8QL, UK (together with Biocompatibles, the "Assignor") to enter, into this Patent Assignment to assign and transfer the Patents (as defined in the Purchase Agreement) listed in the attached Schedule A (collectively, the "Assigned Patents") to Assignee; and

WHEREAS, Assignor is the owner of all rights, titles and interests in, under and to the inventions claimed by the Assigned Patents ("Patent Rights"), and Assignee is desirous of acquiring all of said Assigned Patents and Patent Rights.

NOW, THEREFORE, for good and valuable consideration referred to in the Purchase Agreement, the receipt of each of which is hereby acknowledged, the parties hereto agree as follows:

1. Assignor does hereby assign to Assignee, all right, title and interest in and to the Assigned Patents and Patent Rights, including any and all causes of action, rights and remedies arising under such Assigned Patents or Patent Rights prior to or after the effective date of this Patent Assignment, and any divisions, reissues, continuations, continuations-in-part, renewals, extensions, revisions and foreign counterparts of such Assigned Patents and Patent Rights to be held and enjoyed by Assignee for its own use and benefit and for the use and benefit of its successors, assigns or other legal representatives to the end of the term for which such Assigned Patents and Patent Rights are granted or reissued as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment had not been made.

2. Assignor authorizes and empowers Assignee or its nominees to invoke and claim for the Assigned Patents and Patent Rights any and all other form of protection, the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and to invoke and claim such right of priority without further written or oral authorization from Assignor.

3. Assignor hereby consents that a copy of this Patent Assignment shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document which may be required in the United States or any foreign country for any purpose, and more particularly but without limitation in proof of the right of Assignee or its nominees to claim the aforesaid benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it.

4. Assignor hereby authorizes the respective officials whose duty it is to issue patent rights or other forms of industrial property protection to issue to or as requested by Assignee, in accordance with the terms of this Patent Assignment, the Assigned Patents and Patent Rights, and to issue any and all letters patent and Patent Rights resulting from the Assigned Patents and Patent Rights and from any and all reissues, re-examinations, divisions, continuations, renewals, extensions, continuations-in-part, revisions, and foreign counterparts thereof, such that all letters patent and other Patent Rights resulting from the Assigned Patents and Patent Rights, and any worldly rights not expressly referenced herein on the inventions, vest in and accrue to Assignee.

5. Assignor hereby represents and warrants that it has the full right and power to convey the entire rights, titles and interests herein assigned and that it has not executed and will not execute any agreement in conflict herewith.

6. At the request and expense of Assignee, Assignor agrees to execute and deliver all documents, papers, instruments and assignments, and to perform any other reasonable acts Assignee may require, in order to vest in Assignee all of Assignor's rights, titles, and interests in and to the Assigned Patents and the Patent Rights, including but not limited to delivery of all Documents (as the term is used in the Purchase Agreement), and the transfer of power of attorney and other indicia of authority pertaining to the Assigned Patents, and the provision of evidence to support any of the foregoing in the event such evidence is deemed necessary by Assignee, to the extent such evidence is in the possession or control of Assignor.

7. Assignor hereby irrevocably makes, constitutes and appoints Assignee, and authorizes and empowers Assignee to make, constitute and appoint any officer or agent of Assignee as Assignee may select in its exclusive discretion, as such Assignor's true and lawful attorney-in-fact, with full power of substitution and with the absolute power and authority to take any and all action and to execute thereafter any and all applications, documents, papers, filings and instruments which Assignee deems necessary or desirable to accomplish the purposes of this Assignment. Assignor hereby ratifies and confirms all that such attorney shall lawfully do or cause to be done by virtue hereof.

8. This Agreement is linked to the Purchase Agreement so that if for any reason the Purchase Agreement was to be declared void or null, the present Agreement would be automatically declared void or null.

9. This Agreement may be executed in one or more counterparts, each of which shall for all purposes be deemed an original and all of which shall constitute one and the same agreement.
