SCHEDULE 1

Invention

SYSTEM AND METHOD FOR ROUTING ELECTRONIC CONTENT TO A RECIPIENT DEVICE

ABSTRACT

A system and method for routing electronic content to a recipient device comprising a plurality of network nodes, each network node adapted to receive and forward electronic content and an activity profile server adapted to be in data communication with each network node, the activity profile server adapted to monitor the activity level of each network node and inform each network node on the congestion level of an adjacent network node; wherein each network node is adapted, on receiving the information on congestion level to store electronic content if the adjacent network node is congested and forward the electronic content to the adjacent network node if the adjacent network node is not congested is disclosed.
