PATENT SECURITY AGREEMENT

THIS PATENT SECURITY AGREEMENT, dated as of March 27, 2014, is made by each of the entities listed on the signature pages hereof (each a “Grantor” and, collectively, the “Grantors”), in favor of General Electric Capital Corporation (“GE Capital”), as administrative agent (in such capacity, together with its successors and permitted assigns, “Agent”) for the Secured Parties (as defined in the Credit Agreement referred to below).

RECITALS

A. Pursuant to the Credit Agreement, dated as of March 27, 2014 (as amended, restated, supplemented or otherwise modified from time to time, the “Credit Agreement”), by and among Borrowers, Borrower Representative, the other Credit Parties, Lenders and L/C Issuers from time to time party thereto and GE Capital, as Agent, Lenders and L/C Issuers have severally agreed to make extensions of credit to Borrower upon the terms and subject to the conditions set forth therein.

B. Each Grantor has agreed, pursuant to a Guaranty and Security Agreement of even date herewith in favor of Agent (as amended, restated, supplemented or otherwise modified from time to time, the “Guaranty and Security Agreement”), to guarantee the Obligations (as defined in the Credit Agreement) of each Borrower.

C. All of Grantors are party to the Guaranty and Security Agreement pursuant to which Grantors are required to execute and deliver this Patent Security Agreement.

AGREEMENT

NOW, THEREFORE, in consideration of the premises and to induce Lenders, L/C Issuers and Agent to enter into the Credit Agreement and to induce Lenders and L/C Issuers to make their respective extensions of credit to Borrowers thereunder, each Grantor hereby agrees with Agent as follows:

Section 1. Defined Terms. Capitalized terms used herein without definition are used as defined in the Guaranty and Security Agreement.

Section 2. Grant of Security Interest in Patent Collateral. Each Grantor, as collateral security for the prompt and complete payment and performance when due (whether at stated maturity, by acceleration or otherwise) of the Secured Obligations of such Grantor, hereby mortgages, pledges and hypothecates to Agent for the benefit of the Secured Parties, and grants to Agent for the benefit of the Secured Parties a Lien on and security interest in, all of its right, title and interest in, to and under the following Collateral of such Grantor (the “Patent Collateral”):

- (a) all of its Patents and all IP Licenses providing for the grant by such Grantor of any right under any Patent, including, without limitation, those referred to on Schedule 1 hereto;
- (b) all reissues, reexaminations, continuations, continuations-in-part, divisionals, renewals and extensions of the foregoing; and
- (c) all income, royalties, proceeds and Liabilities at any time due or payable or asserted under and with respect to any of the foregoing, including, without limitation, all rights to

sue and recover at law or in equity for any past, present and future infringement, misappropriation, dilution, violation or other impairment thereof.

Section 3. Guaranty and Security Agreement. The security interest granted pursuant to this Patent Security Agreement is granted in conjunction with the security interest granted to Agent pursuant to the Guaranty and Security Agreement and each Grantor hereby acknowledges and agrees that the rights and remedies of Agent with respect to the security interest in the Patent Collateral made and granted hereby are more fully set forth in the Guaranty and Security Agreement, the terms and provisions of which are incorporated by reference herein as if fully set forth herein.

Section 4. Grantor Remains Liable. Each Grantor hereby agrees that, anything herein to the contrary notwithstanding, such Grantor shall assume full and complete responsibility for the prosecution, defense, enforcement or any other necessary or desirable actions in connection with their Patents and IP Licenses subject to a security interest hereunder.

Section 5. Counterparts. This Patent Security Agreement may be executed in any number of counterparts and by different parties in separate counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement. Signature pages may be detached from multiple separate counterparts and attached to a single counterpart.
