ASSIGNMENT

WHEREAS, Peter McGrath and Robert W. White, of the cities and states set forth below (hereinafter "Assignor") have invented certain new, original, and ornamental designs (hereinafter "Invention") described in the United States design patent application entitled "KITE FLYING DEVICE" for which Assignors are making application for PATENT OF THE UNITED STATES, which application has been duly executed by the Assignors and is being filed concurrently herewith, or on _____, 2013 as application Serial No. _____ ;

WHEREAS, CASTAKITE LLC, a corporation organized and existing under the laws of the State of New York, USA, having a place of business at 64 Mansion Ridge Blvd., Monroe, New York 10950, with a mailing address of 64 Mansion Ridge Blvd., Monroe, New York 10950, USA (hereinafter called "Assignee"), is desirous of acquiring the entire right, title and interest in and to the Invention within the United States of America and its territorial possessions and all foreign countries, and in and to any United States or foreign PATENT that may be granted therefor;

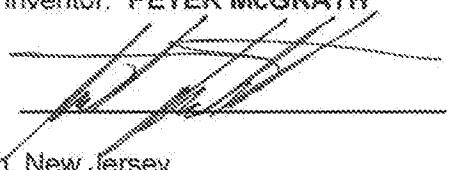

NOW, THEREFORE, for good and valuable consideration, the receipt of which is hereby acknowledged, the Assignors have assigned, sold and transferred, and do assign, sell and transfer to the Assignee, its successors and assigns, the entire right, title and interest in and to the Invention within the United States of America and its territorial possessions and all foreign countries, and in and to any PATENT of the United States and foreign countries, including utility models, inventor's certificates and like government grants that may be granted for any and all portions thereof, and in and to the patent application identified above and applications for patent filed for the Invention in all foreign countries and all provisional, divisional, reissue, continuation, continuation-in-part applications and extensions of any of the applications for patent or PATENT identified herein, including all applications claiming the priority of said applications for patent or PATENT identified herein, and the right to apply for PATENT in foreign countries with full benefit of such priorities as may now or hereafter be granted to the Assignor by local laws or by treaty, including any international convention, for the protection of industrial property, together with the right to extend the protection of the United States PATENT to the various territorial possessions now owned or which may be hereafter acquired by the United States of America. The Assignee will hold all rights for its own use and benefit and for the use and benefit of its successors or assigns to the full end of the term for which the PATENT may be granted, as fully and entirely as the same would have been held and enjoyed by the Assignor if this assignment and sale had not been made. The Assignor requests and authorizes the Commissioner of the U.S. Patent and Trademark Office, and foreign counterpart officials of foreign patent offices, to issue respective PATENT in the United States and foreign countries when granted, in accordance with this assignment.

Assignors further covenant and agree with the Assignee that Assignors have a full and unencumbered title to the Invention, which title Assignors warrant to the Assignee. Each Assignor further agrees that Assignor will, without demanding any further consideration therefor, at the request and expense of the Assignee, do all lawful and just acts, including the execution and acknowledgment of instruments, that may be or become necessary for obtaining, sustaining, extending, reissuing or reexamining United States and foreign PATENT or the like for the Invention, and for maintaining and perfecting the Assignee's right to the Invention and PATENT particularly in cases of interference conflict, opposition and litigation.
