ASSIGNMENT

WHEREAS, Joern Steppan, Christian Marten, Christoph Wangenheim, and Rocco Eisseler, Sr., are the inventors of an invention titled SYSTEM AND METHOD FOR FORMING A BORE IN A WORKPIECE, for which an application for United States Letters Patent was filed on August 17, 2012, as U.S. Non-Provisional Application No. 13/588,792.

WHEREAS, Baker Hughes Incorporated, whose post office address is 2929 Allen Parkway, Suite 2100, Houston, Texas 77019-2118, a corporation created and existing under and by virtue of the laws of the State of Delaware, is desirous of acquiring the entire right, title, and interest in and to the aforesaid invention throughout the world; and all right, title and interest in, to and under any and all Letters Patent of the United States and all other countries throughout the world;

NOW, THEREFORE, be it known by all whom it may concern that for and in consideration of One Dollar (\$1.00), the receipt of which is hereby acknowledged, and for other good and valuable consideration, we the inventors hereby sell, assign, transfer, and set over to Baker Hughes Incorporated, all right, title and interest in and to the said invention throughout the entire world, in and to said application for U.S. Letters Patent, and any and all divisions, continuations, substitutions, continuations-in-part, and reissues thereof, and any and all Letters Patent of the United States and foreign countries which may be granted therefore on such inventions or improvements; and specifically including the right to file foreign applications under the provisions of any convention or treaty and claim priority based on such application in the United States. The assignments and transfers described herein are to be held and enjoyed by Baker Hughes, Incorporated for its own use and benefit, and for the use and benefit of its successors, assigns, or other legal representatives, to the end of the term or terms for which said Letters Patent of the United States or foreign countries are or may be granted or reissued, as fully and entirely as the same would have been held and enjoyed by me if this assignment and sale had not been made. We further hereby assign and transfer to said corporation whatever cause of action we may have for past or present infringement of said invention, together with the right to bring suit for any such infringement and to seek and receive damages and other relief arising from any such infringement.

We the inventors do hereby authorize and request the Commissioner of Patents and Trademarks to issue any and all Letters Patent of the United States on said invention or resulting from said application and from any and all divisions, continuations, and reissues thereof, to Baker Hughes, Incorporated, as assignee of my entire interest, and hereby covenant that we have the full right to convey the entire interest herein assigned, and that we have not executed and will not execute any agreement in conflict herewith.

We the inventors do further hereby covenant and agree that we will, at any time, upon request, execute and deliver any and all papers that may be necessary or desirable to perfect the title of said invention and to such Letters Patent as may be granted therefore to Baker Hughes

Incorporated, its successors, assigns, or other legal representatives and that if Baker Hughes Incorporated, its successors, assigns or other legal representatives shall desire to file any divisional or continuation applications or to secure a reissue of such Letters Patent, or to file a disclaimer relating thereto, will upon request, sign all papers, make all rightful oaths and do all lawful acts requisite for the filing of such divisional or continuation application, or such application for reissue and for the procuring thereof, and for the filing of such disclaimer, without further compensation but at the expense of said assignee, its successors, or other legal representatives.

We the inventors do further covenant and agree that we will, at any time upon request, communicate to Baker Hughes Incorporated, its successors, assigns or other legal representatives, such facts relating to said invention and Letters Patent or the file history thereof as maybe known to us, and testify as to the same in any interference or other litigation when requested so to do, without further compensation but at the expense of said assignee, its successors, or other legal representatives.

EXECUTED THIS 21st day of September, 2012.

**Your invention disclosure, "System and method for influencing the path of a hole in a workpiece",
re: claim**

Dear Mr. Eisseler,

With respect to §§ 6 and 7 of the Employee Invention Act (ArbnErfG), the University of Stuttgart makes unlimited claim to your share of the invention, which is the subject of your disclosure of invention from September 3, 2012 (received on September 11, 2012). Thus, all rights to your share of the invention are subrogated to us.

Please confirm that you have received this letter by signing the included copy, and that you subsequently return it to us as soon as possible.

Kind regards,

Invention “System and method for influencing the path of a hole in a workpiece”, re: transfer

Dear Professor Oppelt,

In accordance with the letter of September 9, 2012, the University of Stuttgart has made unlimited use of the above-mentioned invention with respect to the employee-inventor at the University of Stuttgart, Mr. Rocco Eisseler, Dipl.-Ing, Dipl.-Gwl [MS Eng., MA Ed.]. The rights to the inventor's share have thus been subrogated to the University of Stuttgart.

As we discussed in our telephone call on November 19, 2012, the University of Stuttgart hereby **transfers** its rights to this invention henceforth to Baker Hughes INTEQ GmbH for a fee of **3,000.-€**, with the provision for a simple right of use for research and teaching purposes.

To indicate that you have received and accepted the transfer, we ask that you sign the included copy, and that you subsequently return the copy to us.

Kind regards,

Ralf Kaun, Dr.-Ing.

The unlimited transfer of rights is accepted.
