ASSIGNMENT OF PATENT RIGHTS

Mark Vincent Bowles, Pieter Van Rooyen, and Michael Librizzi (collectively, "Assignors," and each individually an "Assignor,") desire to assign their/its entire right, title and interest, if any, in and to the inventions described in the Applications (as defined below) and Patents (as defined below) (the "Inventions") to ecoATM, Inc., a corporation of Delaware having its principal place of business at 10515 Vista Sorrento Parkway, San Diego, CA 92121 ("Assignee"). Therefore, for valuable consideration, the receipt and sufficiency of which Assignor acknowledges, to the extent not previously assigned, transferred and/or conveyed unto Assignee, Assignor does hereby assign, transfer, and convey unto Assignee all right, title, and interest that exist today and may exist in the future in and to any and all of the following (collectively, the "Rights"):

- The Inventions and all rights in any country in the world with respect to the Inventions;
- The patents listed below in Table A, and all letters patents, patents or other governmental grants or issuances that may be granted or issue with respect to the Inventions (the "Patents");
- The patent applications listed below in Table B, and all divisionals, continuations, and continuations-in-part, continuing prosecution applications, requests for continuing examinations, registrations, or other applications filed with respect to the Inventions and/or claiming priority rights directly or indirectly from such applications and/or the Patents (the "Applications");
- All reissues, reexaminations, post grant proceedings/results, extensions or registrations of any and all of the Applications and the Patents;
- All inventions, invention disclosures, and discoveries described in any and all of the Applications and the Patents;
- All non-United States patents, patent applications, and counterparts relating to the Inventions, the Applications, and the Patents including, without limitation, certificates of invention, utility models, industrial design protection, design patent protection, and other governmental grants or issuances, and including the right to file non-United States applications directly in the name of Assignee, its successors and assigns;
- The right to claim priority rights deriving from the Patents and/or Applications;
- All causes of action (known or unknown), rights of enforcement and remedies (including the right to recover damages, obtain injunctive relief and other legal, equitable and statutory remedies) related to the Inventions, Applications, and Patents (including, without limitation, the right to sue for past, present or future infringement), provisional rights under 35 U.S.C. sec. 154, misappropriation or violation of rights related to the Inventions, Applications and Patents);
- All rights to collect royalties and other payments under or on account of any of the Inventions, Applications and Patents; and
- Any and all other rights and interests arising out of, in connection with, or in relation to the Inventions, Applications and Patents.

Assignor will not sign any writing or do any act conflicting with this Assignment, and, without further compensation, will sign all documents and do such additional acts as Assignee, its successors, legal representatives and assigns deem necessary or desirable to: perfect enjoyment of the Rights; conduct proceedings regarding the Rights, including any litigation or interference proceedings; or perfect or defend title to the Rights. Assignor requests the respective patent office or governmental agency in each jurisdiction to issue any and all patents, certificates of invention, utility models or other

governmental grants or issuances that may be granted upon any of the Rights in the name of Assignee, as the assignee to the entire interest therein.

The terms and conditions of this Assignment will inure to the benefit of Assignee, its successors, legal representatives and assigns and will be binding upon Assignor, its successors, legal representatives and assigns.
