This PATENT ASSIGNMENT is made as of May 13, 2014, from Newfield Wireless, Inc., a California corporation ("Assignor") to Tektronix Communications, a Texas corporation ("Assignee").

WHEREAS, Assignor owns all right, title and interest in and to the patents and patent applications identified on the attached Schedule A, all other registered patents and pending applications owned by Assignor, together with all improvements thereon and betterments thereof, all divisions, continuations and reissues thereof and substitutions of or for said applications, and all rights and privileges under the Letters Patent that may be granted therefor, including the right to claim the benefit of an earlier filing date for the same invention in a foreign country (collectively, the "Patents").

WHEREAS, Assignor wishes to assign, and Assignee wishes to acquire, all of Assignor's right, title and interest in and to the Patents, throughout the world.

NOW, THEREFORE, in consideration of the promises and of the mutual covenants and conditions contained herein, and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, Assignor and Assignee hereby agree as follows:

1. Assignor hereby sells, assigns, transfers, and sets over to Assignee, Assignor's entire right, title and interest in and to the Patents throughout the world, the inventions claimed therein, any renewals, continuations, divisionals, continuations-in-part (in whole or in part) filed by Assignee, including all Letters Patent of the United States and all re-examinations, re-issues and extensions thereof and all patents for industrial property protection in other countries and jurisdictions that may be granted thereon, and all rights to claim priority on the basis of such application(s), and the right to bring actions for past or future infringements or other violations of the rights assigned herein; and Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States and the patent authorities of other countries and jurisdictions to issue all Patents, hereafter in accordance with the terms of this Assignment;
2. Assignor, hereby agrees that it will promptly communicate to the aforesaid assignee or its assigns full and complete information concerning said improvements or betterments of the inventions disclosed in said application, and will cooperate at any time upon request of said assignee or its assigns, at its expense, in the procurement of patent protection to cover the inventions herein assigned and to be assigned, including the execution of new, divisional, continuing and reissue applications; will make all rightful oaths, will testify in any proceedings in the United States Patent Office or in the Courts, and generally will do everything lawfully possible to aid said assignee, its successors, assigns and nominees to obtain, enjoy and enforce proper patent protection for the inventions embraced within the terms of this document.

3. Assignor hereby further covenants that: Assignor has the full right to convey the interest assigned by this Patent Assignment; Assignor shall cooperate with Assignee, at Assignee's request, to execute all documents reasonably necessary to perfect the interests assigned hereby; and Assignor has not executed and will not execute any agreement in conflict with this Assignment.
