ASSIGNMENT

For good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, we, Stephen J. Bresina, of Muhlestrasse 5, CH-7260, Davos Dorf, Switzerland and Slobodan Tepic, of Rigistrasse 27B, CH-8006 Zurich, Switzerland, hereby assign to Sevon Orthopaedics AG, a corporation having a place of business at Seestrasse 295, CH-8804, Au, Switzerland, and its successors and assigns (collectively hereinafter called "the Assignee"), the entire right, title, and interest throughout the world in the inventions and improvements which are described and/or claimed in a patent application entitled "Wear-Reducing Ring for Articulations in Total Joint Replacements," which was filed with the United States Patent and Trademark Office on September 1, 2011, and assigned U.S. Application Number 61/529,977 ("said application").

This assignment further includes all our rights in any inventions and improvements that are described and/or claimed in any application that is a utility application claiming the benefit of the priority date of said application ("said utility application"); any continuation, continuation-in-part, or divisional application of said application or said utility application; any patent(s) that issue from the foregoing application(s), including any utility patents and models; any patent(s) that issue from the foregoing application(s) and are subjected to reexamination and/or reissue proceedings; and any design registrations granted for any of the inventions or improvements described in the foregoing application(s) or patent(s). This assignment further includes any and all patents and patent applications claiming or having the right to claim priority to the filing date of said application, said utility application, or any continuation, continuation-in-part, or divisional application thereof under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Convention, and all other treaties of like purpose.

This assignment also includes, without limitation, any claims, whether known or unknown, and whether suspected or unsuspected, of any nature that we have or may have against any party for infringement of any of the patents referenced herein and the right to sue for past infringement and to recover and retain damages and profits in respect thereof.

We authorize the Assignee to apply in all countries in our names or in its own name for patents, utility models, design registrations, and like rights of exclusion and for inventors' certificates for said inventions and improvements.

We hereby covenant and agree that we will communicate to the Assignee or the Assignee's nominee(s) all facts known to us pertaining to said inventions and improvements, and we agree for ourselves and our respective heirs, legal representations, and assigns, without further compensation, to perform such lawful acts and to sign such further applications, assignments, reissues, Preliminary Statements, and other lawful documents, testify in all legal proceedings, make all rightful oaths and

declarations, and in general perform or cause to be performed all lawful acts necessary or proper to aid the Assignee or nominees in obtaining, maintaining, and enforcing all lawful patent protection for the inventions and improvements in the United States and in other countries or regions.

We hereby covenant that we have the full right to convey the entire right, title, and interest herein assigned and that we have not executed and will not execute any agreement in conflict herewith.
