## ASSIGNMENT OF INVENTION

The inventions or improvements assigned herein are set forth in the following patent application:

Patent Application No.: US 14/327,882

Title: Method and Apparatus for Moisture Detection

Filing Date: July 10, 2014

First Named Inventor: Brian C. Woodbury

Docket No.: 1402.111.010

This Assignment is made and entered into as of July 3, 2014 by and between the below named inventor(s) ("Assignor") as assignor, in favor of **Helvetia Wireless LLC** ("Assignee"), a Delaware Limited Liability Company, as assignee as set forth herein.

### RECITAL

WHEREAS, Assignor and Assignee have agreed that Assignor will assign and transfer to Assignee the above identified patent application along with the inventions and/or improvements disclosed therein (herein "Invention").

### AGREEMENT

NOW, THEREFORE in consideration of the mutual covenants and agreements contained herein, and for other good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, Assignor hereby agrees as follows:

Assignor hereby sells, transfers, and assigns to Assignee all right, title, and interest worldwide in and to the Invention and all intellectual property used or reserved for use in connection with or related to the Invention, and all physical media on which any such intellectual property is contained, in the United States and all foreign countries, together with any other intangible rights associated therewith (collectively, the "Transferred Invention") including the rights to file and obtain United States and corresponding foreign patents in any country, inventor's certificates and utility models, and all divisions, reissues, substitutions, continuations, maintenance, and renewals, and all rights to protect the Transferred Invention including, but not limited to, all rights of recovery and of legal action for past, present, and future infringements of the Transferred Invention.

Assignor hereby authorizes Assignee, its successors and assigns to the fullest extent permitted by applicable law, to file in Assignee's own name applications for patents and/or certificates in the United States and in foreign countries in connection with the Transferred Invention, and to secure in Assignee's own name the patents and/or certificates granted thereon.

Assignor agrees to provide all assistance reasonably requested by Assignee, at Assignee's expense, in the establishment, registration, maintenance, preservation and enforcement of Assignee's rights in or to the Transferred Invention.

To the extent any right, title or interest in and to any Transferred Invention cannot lawfully be assigned by Assignor to Assignee, Assignor hereby grants to Assignee an exclusive, fully paid-up, transferable, irrevocable, perpetual, worldwide license (with full rights to sublicense) to use, exploit, and practice any such nonassignable right, title, and interest. To the extent any right, title, or interest in and to any Transferred Invention can neither be lawfully assigned nor licensed by Assignor to Assignee, Assignor hereby irrevocably waives and agrees never to assert such nonassignable and nonlicensable right, title or interest against Assignee or any of its affiliates or any of Assignee's successors in interest.

We authorize and empower the Assignee, its successors and assigns, to seek the benefit of the right of priority for the Transferred Invention available under any and all applicable laws, treaties or conventions in force now and in the future, and to invoke and claim such right of priority without further written or oral authorization from us.

Assignor hereby consents that a copy of this Assignment shall be deemed a full legal and formal equivalent of any assignment, consent to file, or like document which may be required in any country for any purpose and more particularly in proof of the right of the Assignee, its successors and assigns, to claim the aforesaid benefit of the right of priority.

Assignor agrees to execute or cause to be executed any additional documents ("Supporting Documents") and take or cause to be taken any further actions reasonably requested by Assignee to carry out the intent and purpose of this Assignment. If Assignor fails or refuses to execute any Supporting Documents, or take such further actions, Assignor hereby agrees, for itself and its successors, assigns, donees, and transferees, to the fullest extent permitted by law, that the officers of Assignee, and of any successor of Assignee, shall be, and are hereby, irrevocably appointed Assignor's attorneys-in-fact with full authority to execute any Supporting Documents requested by Assignee, and to perform all other acts necessary to effect, perfect or evidence this Assignment.

Assignor affirms to Assignee, its successors and assigns, that the rights and property herein conveyed are free and clear of any encumbrance, and that Assignor has full rights to convey the Transferred Invention.

This Assignment may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, Assignor and Assignee have executed and entered into this Assignment on the day and year set forth above.

Assignor: First of Two Inventors

US 14/327,882 filed July 10, 2014
