Assignment of Patents and Patent Applications Agreement

This Assignment of Patents and Patent Applications Agreement (the "Agreement") is made as of May 1, 2013 (the "Effective Date"), by and between Richard R. Heuser, an individual ("Seller"), and Arizona Medical Systems, LLC, ~~an Arizona~~ limited liability company ("Buyer"),
a Delaware

Whereas, Seller is the owner of the inventions described in the patents and patent applications listed in the attached Exhibit A (the "Patents"); and

Whereas, Buyer desires to acquire the Patents in exchange for the membership interest to be issued to Seller in accordance with the Amended and Restated Operating Agreement of Buyer, dated as of the Effective Date, by and among Buyer and the members and managers party thereto (the "Operating Agreement"), and the assignment of the Patents is a condition to the effectiveness of such Operating Agreement.

Now, therefore, for good and valuable consideration, the receipt and sufficiency of which are hereby expressly acknowledged, Buyer and Seller hereby agree as follows:

1. Seller sells, assigns and transfers to Buyer, Seller's entire right, title and interest in and to the Patents throughout the United States of America and all territories and possessions thereof, for all foreign countries and under all international agreements, and all other patents or applications hereafter filed in the United States, in any other country, or under any international agreement claiming priority to the Patents, and all Letters Patents granted thereon by the United States, by any other country or under any international agreement, and Seller does hereby authorize and request the Commissioner of Patents and Trademarks to issue said U.S. Letters Patent to Buyer. Seller further grants to Buyer, its successors and assigns, the right to claim for any of said Patents the full benefits and priority rights of any international agreement between the United States and any foreign country or between any other countries, to the full extent of the term for which a patent may be granted therefore, together with the inventions described in the Patents, as fully and entirely as the same would have been held by Seller had this assignment not been made. Seller further grants to Buyer, its successors and assigns, Seller's entire right, title and interest in and to any and all claims and demands it may have, at law or in equity, for past infringement of the Patents.
2. Seller hereby represents and warrants that it has the full right and power to enter into this Agreement, and that Seller holds all right, title, and interest in and to the Patents and there are no outstanding agreements, assignments, liens, pledges, security interests in, or any other encumbrances upon the Patents. Seller further represents and warrants that it is not aware of any infringement of the Patents through the practicing of the Patents. Seller shall defend (upon request) and indemnify Buyer, its officers, directors, shareholders, agents, customers, manufacturers, distributors, employees, attorneys, creditors and advisors, against, and hold them harmless from, any and all liabilities, claims, demands, causes of action or damages asserted or brought by a third party, including reasonable attorneys' and experts' fees, that may result in, or arise out of, a breach of Seller's representations and warranties under this Agreement.

[signatures appear on next page]

In witness whereof, Seller has caused this Assignment of Patents and Patent Applications Agreement to be executed by its duly authorized representative as of the date indicated below.
